

ASIA DENGUE CONFERENCE

Dengue : New Challenges, New Strategies

23 - 24 April 2016 | JW Marriot Kuala Lumpur, Malaysia

Organized by:

Malaysian Society of Infectious
Diseases & Chemotherapy (MSIDC)

Tropical Infectious Diseases Research
& Education Centre (TIDREC)
WHO Collaborating Centre (WHOCC)
for Arbovirus Reference & Research

Supported by:

Ministry of Health Malaysia

Introduction

Dengue has emerged as a worldwide problem since the 1950s. About half of the world's population is at risk of this mosquito-borne disease. Dengue is found in tropical and sub-tropical climates areas, with cases reported in more than 150 countries. Dengue patients show non-specific febrile syndrome in early stage which may delay early diagnosis. Although not all dengue infections result in illness, some dengue patients may progress to life-threatening haemorrhagic fever and dengue shock syndrome. Today, we are facing huge challenges in managing dengue associated complications which can lead to hospitalizations and/or deaths.

In view of these challenges and with the support from the Ministry of Health Malaysia, the Malaysian Society of Infectious Diseases & Chemotherapy (MSIDC), Tropical Infectious Diseases Research & Education Centre (TIDREC), Aesculap Academy and WHO Collaborating Centre (WHOCC) for Arbovirus Reference & Research have taken the initiative to provide a platform to address various pertinent issues on the challenges, diagnosis, treatment and best practices in managing this growing menace in the region.

Drawing expertise from more than twenty international, ASEAN and local speakers, the scientific committee has put together a comprehensive programme which features seven (7) plenary sessions and eleven (11) concurrent symposia, covering topics such as:

- Clinical Predictors of Severe Dengue
- Dengue Vaccination : Current Landscape in Asia
- Innovative strategies & tools for dengue surveillance & control
- Dengue detection tools
- Viral Tropism and pathogenesis
- Updates on Pathophysiology of Dengue Infection
- Challenges and Strategies to Decrease Dengue Morbidity & Mortality
- Sharing of Experience from various countries in ASEAN on Monitoring In Severe Dengue, Advances in Lab Diagnosis for Dengue, Fluid Management in Dengue, Best Practices in Vector Control, Dengue in Special Groups, and many more.

All medical doctors, other healthcare professionals and researchers involved in the management and research of dengue.

Continuous Professional Development (CPD) Accreditation

Continuous Professional Development (CPD) points will be awarded by the Ministry of Health Malaysia and the Malaysian Medical Association to all participants who have attended the full duration of the programme.

Pre-Conference Workshop on Dengue Molecular Detection

Date : 21 – 22 April 2016
 Venue : Surveillance Laboratory, TIDREC
 Department of Medical Microbiology, University Malaya

In this two-day pre-conference workshop, participants will be exposed to the molecular techniques employed for the detection of dengue viruses from clinical or research materials. This workshop is targeted to academics, researchers, laboratory personnel and students interested in the laboratory detection, diagnosis and surveillance of dengue.

The workshop incorporates lectures, hands-on practical sessions and discussions on up-to-date techniques of the conventional and most recently developed technologies for detecting and serotyping of dengue viruses, including quantitative RT-PCR and the Recombinant Polymerase Amplification (RPA).

This workshop is limited to 20 places only. Due to limited places, registration is on a first-come-first-served basis. Confirmation of registration is upon receipt of the registration form (Attachment 1) and proof of payment. Early registration is highly recommended in order to avoid disappointment.
