COURSE OVERVIEW

Everything Cardiac

JUNE 7-8
Mason, OH
Presented by Kristine Peterson

APPROVED FOR
RN/LPN/LVN
14 Contact Hours
Includes 4 Pharmacology Contact Hours
CRNA
14 Class A CE Credits

PROGRAM LEARNING OUTCOMES

- This program prepares the learner to:
- ✓ Apply physiological concepts to your understanding of cardiovascular drug therapy.
- ✓ Utilize physical assessment skills to evaluate a patient's cardiovascular status.
- ✓ Utilize the 12-Lead ECG to evaluate patients with chest pain and acute coronary syndrome.
- ✓ Utilize the bedside cardiac monitor to evaluate arrhythmias and to assess the ST segment and the QT interval.
- ✓ Discuss management of patients with heart failure, acute coronary syndromes and atrial fibrillation.

PRESENTED BY

Kristine Peterson, MS, RN, CCRN, CCNS

Kristine serves as a cardiac clinical nurse specialist at Aspirus Wausau Hospital in Wausau, WI, and has over 35 years of experience in critical care nursing as a staff nurse, preceptor, manager, educator and clinical nurse specialist. Kristine received her Bachelor of Science degree in Nursing from St. Olaf College in Northfield, MN, and her Master of Science degree in Nursing from the University of Minnesota in Minneapolis. She is a past national president of the American Association of Critical-Care Nurses (AACN) and continues to be involved with AACN on a local and national level.

MED-ED reserves the right to substitute an equally qualified speaker if necessary.

COURSE DESCRIPTION

This program provides a clinically applicable review of cardiovascular physiology and pathophysiology, cardiac assessment, cardiovascular pharmacology and interventions based on current guidelines for the most common cardiac disorders seen in clinical practice. Content includes a review of cardiac physiology that can be applied in daily practice, the physiological basis for cardiovascular drug therapy and the pathophysiology, diagnosis and guideline-based treatment strategies for heart failure, acute coronary syndromes and atrial fibrillation. Clinically useful tips on noninvasive assessment techniques and 12-Lead ECG interpretation can be applied in any clinical setting where cardiac patients receive care. Evidence-based practice standards for bedside cardiac monitoring for arrhythmia identification, ST-segment monitoring and QT interval monitoring provide a foundation for the delivery of high quality patient care in any monitored setting.

Sign-in begins at 7:30 am. The day includes a one-hour lunch (on your own), as well as a morning and afternoon break of 15 minutes each. The order of lectures presented and break times may vary according to speaker preference.

Everything Cardiac

FOR FULL AGENDA DETAILS VISIT OUR WEBSITE

- DAY 1 — 8:00 am - 4:30 pm
7 Contact Hours
8:00 Essential Cardiovascular Physiology
Essential Assessment Skills
Cardiovascular Pharmacology
Essentials of 12-Lead ECG Interpretation
4:30 Acute Coronary Syndromes
- DAY 2 — 8:00 am - 4:30 pm
7 Contact Hours
8:00 Understanding Heart Failure
Atrial Fibrillation: Risks and Management
Cardiac Monitoring: Using the Bedside Monitor and 12-Lead ECG for Rhythm Identification
4:30

Groups: Unique group name must be given upon registration. Group members may register separately. Refunds cannot be given for increases in group size. If complete group does not form, additional tuition will be due at sign-in.

Additional Info: Walk-in registrations subject to \$15 fee. Personal checks cannot be accepted on the day of the seminar.

Cancellations: Cancel up to 14 days before course to receive full refund. Within 14 days, a 10% processing fee applies. At any time, full tuition may be applied to products or select seminars. If MED-ED must cancel, MED-ED's liability is limited to tuition.
