

**69th Annual Meeting
Seminars in Pathology**

ATTENDEE PROGRAM

November 29 - December 3, 2016

Hyatt Regency Embarcadero
San Francisco, California

CSP 2016 Annual Meeting

November 29 - December 3, 2016

Welcome Message

Dear Colleagues,

On behalf of the California Society of Pathologists (CSP), I am proud to present our 69th Annual Meeting, "Seminars in Pathology." The 2016 Annual Meeting will be held in beautiful San Francisco at the Hyatt Regency Embarcadero from November 29- December 3, 2016. Join distinguished speakers from across the country and participate in this outstanding educational program along with fellow pathologists.

The courses, tutorials and, lectures are on an array of topics that include Oropharyngeal Pathology, Breast Pathology, Prostate and Kidney Neoplasia, Hematopathology, and ENT Pathology as well as important new concepts that can be applied to your daily practice. Courses will provide opportunities to receive Continuing Medical Education (CME) credits and some will provide Self-Assessment Module credit (SAMs).

This year's program highlights include a presentation by Dr. Lester Thompson, who will provide abbreviations in Thyroid Gland Pathology and NIFTP during the Special Lecture on Friday, December 2. Also on December 2, the Clinical Pathology Lecture will feature Dr. Toby Merlin, who will present on Biological Threats and Emerging Infectious Diseases. Remember to register early to reserve your seat at the highly sought-after video tutorials where space is limited.

As always, the California Society of Pathologists is here to serve and support you, the practicing pathologist, in all of its activities. The CSP recognizes the importance of providing a forum for evolving practice management perspectives, and to communicate challenging ideas that protect and reinforce our specialty. The advocacy work related to government regulations that affect the way we practice pathology is unique to the CSP and is crucial to our profession. With your participation and support, pathology will flourish at the heart of medical practice.

Look for more information regarding the 2016 Annual Meeting and CSP membership on our website: www.calpath.org. I look forward to seeing you in San Francisco!

Respectfully,

Timothy R. Hamill, MD
President

Board of Directors & Education Committee

BOARD OF DIRECTORS

Officers

President..... Timothy R. Hamill, MD
Vice President James B. Carry, MD
Secretary/Treasurer David Slater, MD
Past President Ellen Klapper, MD

Directors

Kim Dickinson, MD Melvin Hoshiko, MD
David B. Kaminsky, MD Luke Perkocha, MD, MBA
Balarum Puligandla, MD Derek Marsee, MD
Gerald Weiss, MD David Park, MD, PhD
Kristie White, MD

RESIDENT REPRESENTATIVES

Michelle Don, MD..... Ryanne Brown, MD

EDUCATION COMMITTEE

Shikha Bose, MD Charles Lassman, MD
Teri Longacre, MD Alfred Lui, MD
Laura Tabatabai, MD Donna Hansel, MD, PhD
Balarum Puligandla, MD, Chair

EXECUTIVE DIRECTOR Robert Achermann, JD

Hotel Information

Hyatt Regency | San Francisco

5 Embarcadero Center, San Francisco, CA 94111
(415) 788-1234

ROOM RESERVATIONS

Call 888-421-1442, and mention the CSP group rate. Or make your reservations online at: <https://resweb.passkey.com/go/2016CSP>

The Hyatt Regency is offering a special rate of \$249 per night for registrants. Reservations must be made by November 8, 2016 to receive the discounted rate. Please reference CSP when making reservations.

Hyatt Regency San Francisco

CSP 2016 Program Schedule

November 29 - December 3, 2016

Tuesday, Nov 29

REGISTRATION 3:00 – 6:00 PM

Come to the registration desk within the Grand Ballroom Foyer to pick up your badge and course list before the Wednesday morning rush!

TUTORIALS 1.5 Hours CME 5:30 – 7:00 PM

1) An Approach to Common Inflammatory Skin Diseases with Clinicopathologic Correlation: The Dialogue between Dermatologist and Pathologist

Kerri Rieger, MD

Objectives:

- Review the major inflammatory skin reaction patterns;
- Recognize key histopathologic features to help differentiate between diseases within a reaction pattern; and
- Correlate histopathologic findings with the clinical presentation to arrive at an accurate diagnosis.

2) Myogenic Tumors of Soft Tissue: Muscling in on Sarcomas

Andrew Horvai, MD

Objectives:

- Distinguish the major categories of smooth muscle, skeletal muscle and myofibroblastic tumors;
- Recognize prognostically significant clinicopathologic features in myogenic tumors, or, if applicable, those with unpredictable prognosis; and
- Efficiently incorporate ancillary diagnostic studies in the workup of the above entities.

Wednesday, Nov 30

SHORT COURSE 3 hours CME + 1 SAMs Grand Ballroom A

8:30AM – 12:00PM

3) Uterine and Extrauterine Mesenchymal & Mixed Epithelial and Mesenchymal Tumors in the Laparoscopic Era: Updates and Problem Cases

Teri Longacre, MD; Robert Soslow, MD; and Amer Karam, MD

Objectives:

- Develop a systematic approach to diagnosis of the laparoscopic biopsy, myomectomy, and morcellated specimen;
- Distinguish stromal from smooth muscle from mixed mesenchymal and epithelial neoplasms and recognize new entities; and
- Be able to diagnose carcinosarcoma from the oncologist's perspective.

1:30PM – 5:30PM

4) Atypical Intraductal Lesions of the Breast: Test Yourself!

Kimberly H. Allison, MD; Kristin Jensen, MD; and Melinda Lerwill, MD

Objectives:

- Enumerate and illustrate a set of carefully defined cytologic and architectural criteria to distinguish non-atypical from atypical/low-grade malignant ductal proliferations;
- Demonstrate the practical application of diagnostic criteria in the categorization of atypical ductal hyperplasia and ductal carcinoma in situ;
- Improve consensus in the diagnosis of atypical ductal hyperplasia through the use of multiple illustrative examples, audience participation, and faculty panel discussion;
- Provide practical approaches to resolve diagnostically challenging and borderline cases (including additional studies, second opinions, and ways of reporting uncertainty);
- Review the appropriate use and interpretation of ancillary immunohistochemical studies in the evaluation of intraductal proliferations;
- Discuss the clinical implications of the different diagnoses; and
- Consider ways to establish quality assurance procedures and improve uniformity in the reporting of intraductal breast lesions in one's practice.

TUTORIALS 1.5 hours CME 5:30 – 7:00 PM

5) Breast Pathology Diagnoses Not to Miss!

Kimberly Allison, MD

Objectives:

- Recognize common diagnostic pitfalls in breast pathology and demonstrate practical application of methods to resolve the appropriate differential diagnoses.
- Understand the differences in clinical impact of the diagnoses in your differential.

6) Liver Tumors: The Difficult, the Challenging and the Exotic

Sanjay Kakar, MD

Objectives:

- Describe the immunohistochemical work-up for benign hepatocellular lesions and be aware of the current terminology;
- Illustrate the challenges in the diagnosis of primary vs. metastatic liver tumors in selected clinicopathologic settings; and
- Enumerate the molecular tests which can be helpful for the diagnosis of liver tumors.

7) Pitfalls in Pancreas Endoscopic US-Guided Fine Needle Aspiration Cytology

Christina S. Kong, MD

Objectives:

- Discuss cases in the context of the Papanicolaou Society of Cytopathology guidelines for standardized terminology and nomenclature for pancreaticobiliary cytology;
- Discuss mimics of mucinous neoplasms, neuroendocrine tumors, and adenocarcinoma; and
- Provide pointers for avoiding pitfalls.

8) Urinary Cytology: Introduction to The Paris System for Reporting Urinary Cytology with Review of Guidelines, Morphological Criteria, and Pitfalls in Diagnosis.

Shikha Bose, MD; and Laura Tabatabai, MD

Objectives:

- To provide an introduction to The Paris System for Reporting Urinary Cytology;
- Review the key morphologic diagnostic criteria and guidelines based on this system; and
- Discuss potential pitfalls and use of ancillary studies in cytological diagnosis of urinary samples.

▶ **REGISTRATION**
7:30a-5:30p | Foyer

▶ **EXHIBITS**
7:30a-3:30p | Ballroom BC

▶ **BREAKFAST**
7:30a-8:30a | Ballroom BC

▶ **BREAKS**
10a, 3p | Ballroom BC

Thursday, Dec. 1

SHORT COURSE 3 hours CME + 1 SAMs **Grand Ballroom A**

8:30PM – 12PM

9) Prostate and Kidney Neoplasia: Update on WHO and AJCC Classifications and Emerging Role of Molecular Diagnostics

Donna Hansel, MD; and Michelle S. Hirsch, MD

Objectives:

- Recognize newly defined prostate and renal neoplastic entities;
- Correctly use and apply new grading schema in prostate and renal neoplasms;
- Understand pitfalls of renal and prostate cancer staging and develop tools to approach staging in challenging specimens; and
- Utilize molecular testing when appropriate to diagnosis and recognize the context of emerging molecular testing available in prostate and renal neoplasia.

1:30PM – 5PM

10) Hematopathology - A Case Oriented Approach to Diagnosis

Jerome S. Burke, MD; and Lawrence M. Weiss, MD

Objectives:

- Understand pragmatic diagnostic issues in hematopathology (i.e. benign versus malignant or precise subclassification within a hematopathologic category); and
- Understand the differential diagnosis, pathobiology and the clinical ramifications of various hematopathologic entities in a case-oriented format including extranodal Rosai-Dorfman disease/histiocytic disorders, splenic lymphomas, specifically splenic mantle cell and marginal zone lymphomas, plasmablastic lymphoma and aggressive B-cell lymphomas, enteropathy-associated T-cell lymphoma and other T-cell and natural killer (NK) lesions of the gastrointestinal tract, lymphoplasmacytic lymphoma and additional low-grade B cell lymphomas and the tissue manifestations of systemic mastocytosis.

TUTORIALS 1.5 hours CME **5:30 – 7 PM**

11) Ovarian Borderline Tumors

Robert Soslow, MD

Objectives:

- How to distinguish borderline tumors from adenoma/adenofibroma and adenocarcinoma;
- Become familiar with the appearance of microinvasion and lymph node involvement by borderline tumor; and
- Learn to distinguish invasive from non-invasive implants.

12) Proper Handling and Assessment of Muscle and Nerve Biopsies by the Community Pathologist

Hannes Vogel, MD; and Greg Moes, MD

Objectives:

- Learn vital information for the surgeon to know regarding dos and don'ts in obtaining muscle and nerve biopsies;
- Understand the key role of the submitting pathologist as an intermediary between the patient's physician requesting the biopsy and the consultant pathologist;
- Know the critical options in immediate processing of specimens in order to allow for the essential (minimal) studies required to evaluate muscle and nerve biopsies; and
- Understand issues in making expeditious diagnoses without specialty consultation.

13) Novel and Classic Cancer Predisposition Syndromes That Affect Children and the Parents That Care for Them: What Every Surgical Pathologist Should Know

Florette K. Gray Hazard, MD

Objectives:

- Identify the histologic features of the most common neoplasms that characterize novel and classic predisposition syndromes as DICER-1 syndrome, INI-1/SMARCB1 Deficient Neoplasms, Gastrointestinal polyposis syndromes, PTEN Hamartoma syndrome, Gardner syndrome, or Familial non-medullary thyroid carcinoma syndrome;
- Describe the genetic alterations that characterize each syndrome; and
- Understand what information is important and should be conveyed in the pathology report.

14) Superficial Lesions of the Bladder: Neoplastic Entities and Their Mimickers

Donna Hansel, MD and Michelle S. Hirsch, MD

Objectives:

- Recognize the distinction between UPUMP, papilloma, PUNLMP, low-grade and high-grade papillary urothelial carcinoma;
- Correctly diagnose nested urothelial carcinoma and distinguish this entity from benign mimickers;
- Identify urothelial carcinoma in situ and its variants and define criteria for early invasive disease, including the role of pT1 substaging; and
- Distinguish benign mimickers of invasive disease in the superficial bladder wall, including pseudoepitheliomatous hyperplasia, nephrogenic adenoma, and florid proliferation of von Brunn nests.

▶ **REGISTRATION**

7:30a-5:30p | Foyer

▶ **EXHIBITS**

7:30a-10:30a | Ballroom BC

▶ **BREAKFAST**

7:30a-8:30a | Ballroom BC

▶ **BREAKS**

10a, 3p | Ballroom BC

Friday, Dec. 2

SHORT COURSE 3 hours CME + 1 SAMs
Grand Ballroom A

8:30 – 12PM

15) New Entities and Old Problems in ENT Pathology

Stacey Mills, MD; and Ed Stelow, MD

Objectives:

- Be familiar with the spectrum of HPV-related head and neck lesions;
- Know how to diagnose newly recognized or understood salivary neoplasms;
- Know about variants of normal, ectopias and metaplasias mistaken for neoplasia; and
- Understand about currently problematic entities in head and neck pathology.

SPECIAL LECTURE 1 hour CME
Grand Ballroom A

1:30 – 2:30 PM

**16) Abbreviations in Thyroid Gland Pathology:
Noninvasive Follicular Thyroid Neoplasm with
Papillary-Like Nuclei (NIFTP)**

Lester Thompson, MD

Objectives:

- Determine the differences in clinical, pathology, molecular, and management outcomes between papillary carcinoma and the newly recognized NIFTP;.
- Categorize the criteria needed to diagnose the tumor; and
- Integrate the specific scoring features to reach a cytologic diagnosis of NIFTP.

CLINICAL PATHOLOGY LECTURE
1 hour CME **Grand Ballroom A**

**17) Biological Threats and Emerging Infectious
Diseases: Laboratory Detection and Response**

Toby Merlin, MD

Objectives:

- Name five organisms or toxins that are likely agents to be used in a malicious biological attack;
- Describe the process for developing molecular diagnostic tests for emerging infectious diseases;
- Describe the Laboratory Response Network (LRN) and its role in detection and diagnosis of biological threats and emerging infectious diseases;
- Describe the process Emergency Use Authorization (EUA) of a diagnostic test for an emerging infectious disease; and
- Describe the role of the laboratory in Zika detection, characterization, and diagnostics.

22) CSP BUSINESS MEETING WITH CAP UPDATE 3:30 – 5:30PM Grand Ballroom A

▶ **REGISTRATION**
7:30a-5:30p | Foyer

▶ **EXHIBITS**
7:30a-10:30a | Ballroom BC

▶ **BREAKFAST**
7:30a-8:30a | Ballroom BC

▶ **BREAKS**
10a, 3p | Ballroom BC

Friday, Dec. 2 (cont.)

TUTORIALS 1.5 hours CME 4:00 – 5:30PM

18) A Potporri of Consult Cases with Emphasis on Head and Neck

Stacey E. Mills, MD

Objectives:

- Understand the ideal way to submit a consult;
- See and understand the speaker's approach to a variety of difficult cases;
- Understand the role of immunohistochemistry and FISH in selected cases;
- Recognize and avoid common mistakes made BEFORE a consult is submitted; and
- Recognize types of consults likely to be "low yield."

19) Top 10 Lessons Learned From the Mayo Clinic Arizona Lung Pathology Consultation Service

Maxwell L. Smith, MD

Objectives:

- Apply a consistent and reproducible morphologic approach to interstitial lung disease;
- Discuss the differential diagnosis of fibrotic lung disease including usual interstitial pneumonia, airway centered fibrosis, and fibrotic nonspecific interstitial pneumonia;
- Employ a checklist for potential causes of acute lung injury;
- Distinguish between benign and reactive mesothelial proliferations; and
- Recognize the importance of clinical and radiographic data in the assessment of interstitial lung disease.

▶ **REGISTRATION**
7:30a-12:00p | Foyer

▶ **BREAKFAST**
7:30a-8:30a | Foyer

Saturday, Dec. 3

**CASE SEMINAR 3 hours CME
8:30AM – NOON**

23) Diagnostic Problems in Surgical Pathology

Kimberly H. Allison, MD; Oluwole Fadare, MD; Michelle S. Hirsch, MD; Grace Kim, MD; Stacey Mills, MD; and Maxwell L. Smith, MD
Moderator: Charles Lassman, MD

Objectives:

- Through the discussion of six problem cases the registrants will become familiar with strategies that experts employ in order to work through challenging case materials;
- Review recent developments and changes in our understanding of the pathophysiology of these problems areas; and
- Review the use of ancillary tests and special stains used in the differential diagnosis of these lesions.

20) The Histotyping of Endometrial Carcinomas: Classics and Challenges

Oluwole Fadare, MD

Objectives:

- Understand the diagnostic features of the most common histotypes of endometrial carcinoma and recognize areas of morphologic overlap between the histotypes;
- Develop a diagnostic approach to resolving challenging areas in the histotyping of endometrial carcinomas; and
- Appreciate the uses and limitations of immunohistochemistry in the histotyping of endometrial carcinomas.

21) Interesting and Informative Lymphoma Cases

Patrick Treseler, MD

Objectives:

- To review morphologic and immunophenotypic features useful in the diagnosis and classification of the malignant lymphomas, with a focus on the 2016 revision of the WHO Classification.

NEW! Placenta Course

Friday 12noon - 5pm and Saturday 8:00am - 5:00pm
13 Hours CME

Hands on training and Instruction with microscopes
Registration limited to 50 participants

Drucilla Roberts, MD and Theonia Boyd, MD

24) Placental Pathology: An Around the Scope Tour

Objectives:

- Understand the clinical utility of placental pathologic evaluation;
- Know the placental pathologies that recur;
- Be able to diagnose specific placental infections; and
- Understand the pathologic features that differentiate complete from partial hydatidiform moles.

CALIFORNIA TUMOR TISSUE REGISTRY

141st Semi-Annual Cancer Seminar

“Evolving Concepts in Soft Tissue Pathology”

December 4, 2016
8:30 a.m. – 4:45 p.m.

Hyatt Regency San Francisco
5 Embarcadero Center
San Francisco, California, 94111
Phone: (415) 788-1234

Andrew L. Folpe, M.D.

Professor and Consultant
Division of Anatomic Pathology
Mayo Clinic, Rochester, MN

Seminar Objectives: At the conclusion of this seminar, attendees will be able to:

1. Recognize the clinical and morphological features of newly or more completely described entities in soft tissue tumor pathology
2. Effectively apply established and new immunohistochemical markers to the workup of soft tissue tumors
3. Appreciate the impact of advances in molecular pathology to the differential diagnosis of soft tissue tumor

This activity has been planned and implemented in accordance with the Essential Areas and policies of the Accreditation Council for Continuing Medical Education through the joint providership of Loma Linda University School of Medicine and California Tumor and Tissue Registry. The Loma Linda University School of Medicine is accredited by the ACCME to provide continuing medical education for physicians. Loma Linda University School of Medicine designates this Live Activity and Enduring Material for a maximum of **10** AMA PRA Category 1 Credit(s) TM. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

The American Board of Pathology also certifies this activity to provide up to **10** hours of SAM credit (Self-Assessment Module).

Registration Form is on the next page

CSP 2016 Program Schedule

November 29 - December 3, 2016

FACULTY

Kimberly H. Allison, MD

Associate Professor of Pathology
Director of Breast Pathology
Associate Director of Anatomic Pathology Residency Training Program
Stanford University Medical Center
Stanford, CA

Shikha Bose, MD

Assistant Professor of Pathology at
Beth Cedars Sinai
Department of Pathology
Alta Bates Summit Medical Center
Berkeley, CA 94705

Oluwale Fadare, MD

University of California, San Diego
San Diego, CA

Donna Hansel, MD, PhD

Director and Professor of Anatomic Pathology
University of California, San Diego
San Diego, CA

Florette K. Hazard, MD

Director of Pediatric Surgical Pathology
Assistant Professor of Pathology and Pediatrics
Stanford University School of Medicine
Department of Pathology
Stanford, CA

Michelle S. Hirsch, MD, PhD

Associate Professor of Pathology
Chief, Genitourinary Pathology Service
Staff Pathologist, Women's & Perinatal Division
Brigham and Women's Hospital
Boston, MA

Andrew E. Horvai, MD, PhD

Clinical Professor, Associate Director of Surgical Pathology,
Medical Director of Histopathology Laboratory,
Departments of Pathology and Laboratory Medicine
University of California, San Francisco
San Francisco, CA

Kristin C. Jensen, MD

Associate Professor of Pathology
Associate Director of Cytopathology
Palo Alto's Veteran's Health Care System
Stanford University Medical Center
Stanford, CA

Sanjay Kakar, MD

Professor and Benedict Yen Endowed Chair for Chief of
Pathology at the VAMC
Pathology & Laboratory Medicine
University of California San Francisco
San Francisco, CA

Amer Karam, MD

Clinical Associate Professor,
Obstetrics & Gynecology – Gynecologic Oncology
Stanford University Medical Center
Stanford, CA

Grace E. Kim, MD

Department of Pathology
UCSF Medical Center
San Francisco, CA

Christina Kong, MD

Professor, Department of Pathology
Director of Cytopathology Service
& Cytopathology Fellowship
Stanford University Medical Center
Stanford, CA

Charles R. Lassman, MD

Professor of Pathology
Vice-Chair for Clinical Education
Geffen School of Medicine
University of California Los Angeles
Los Angeles, CA

Melinda Jean Fan Lerwill, MD

Associate Pathologist, Massachusetts General Hospital
Co-director, Breast Pathology Service
Assistant Professor of Pathology, Harvard Medical School
Boston, MA

Toby L. Merlin, MD

Division of Preparedness and Emerging Infections (DPEI)
National Center for Emerging and Zoonotic Infectious
Diseases (NCEZID)
Office of Infectious Diseases (OID)
Centers for Disease Control and Prevention (CDC)

Stacey E. Mills, MD

W.S. Royster Professor of Pathology
Chief of Anatomic Pathology
Director of Surgical Pathology and Cytopathology
University of Virginia School of Medicine
Charlottesville, Virginia

Greg S. Moes, MD

Attending Pathologist
Anatomic and Clinical Pathology
Neuropathology and Cytopathology
Regional Neuropathology
Pediatric Neurosurgery
TPMG East Bay Medical Center

Kerri Rieger, MD

Maxwell L. Smith, MD
