

2018 Code Ana(phylaxis) Summit: Managing Food Allergy in Schools

April 21, 2018

7:30am - 3:30pm

Residence Inn Downtown,
Charlottesville, VA

Program Overview

Although federal and state guidelines require schools to have medical emergency response plans in place, schools are challenged with managing an increasing number of students with medical issues but without increasing school resources. Specifically, schools in Virginia have access to stock epinephrine auto-injectors; however, schools are not provided with MD-led training or logistical support on how to respond to such a medical emergency. The Code Ana program seeks to fill this gap and the second annual Code Ana Summit will provide attendees with interactive workshops through which they will create the blueprint of their school's response plan. Relevant "quick chat" lectures will be interspersed throughout the day.

Who Should Attend

School nurses, teachers, and other school personnel. Because attendees will spend time working in groups, they will learn from each other and begin to grow a network of school personnel who are committed to optimizing child health in schools. This network will allow attendees to reach out to each other at later dates for feedback and encouragement, thus continuing the conversation and trouble-shooting discussions of how to best manage food allergy and other chronic medical diseases in the school setting.

Agenda	**Syllabus will be provided online only, at www.cmevillage.com
7:30-8:00	Registration & Breakfast
8:00-8:20	Food Allergy: What it is and is not. Intro to Code Ana by: Dr. Alice Hoyt
8:20-10:00	Medical Response Planning - Interactive Session I
10:00-10:20	Break
10:20-10:50	Hot Topics in Food Allergy -Peanuts in schools -Stock epi vs personal epi
10:50-12:00	Medical Response Planning - Interactive Session II
