Aloha!

Welcome to the Hawaii Dental Association Convention 2026. The Hawaii Dental Association is excited to host the premier dental convention in the Pacific. We invite you to join us for a unique and exclusive three-day meeting in Honolulu, Hawaii, from **Wednesday to Friday, January 14 – 16, 2026**, at the beachfront Alohilani Resort.

Continuing dental education sessions will be held by prominent speakers to provide you with the most current scientific and technological information pertaining to dentistry today.

Exhibitors are ready to share with you new information, products, and equipment. Complete details about the speakers, meeting schedule and registration are included in this kit.

Mahalo,

REGISTRATION INFORMATION

Online registration is now open! Please go to:

<http://www.hawaiidentalassociation.net/continuing-education/hda-convention>

NO REFUNDS AND NO CANCELLATIONS AFTER DECEMBER 15TH.

Space is extremely limited; registration closes on December 15 or until capacity is reached. There will be no on-site registration.

EVENT LOCATION

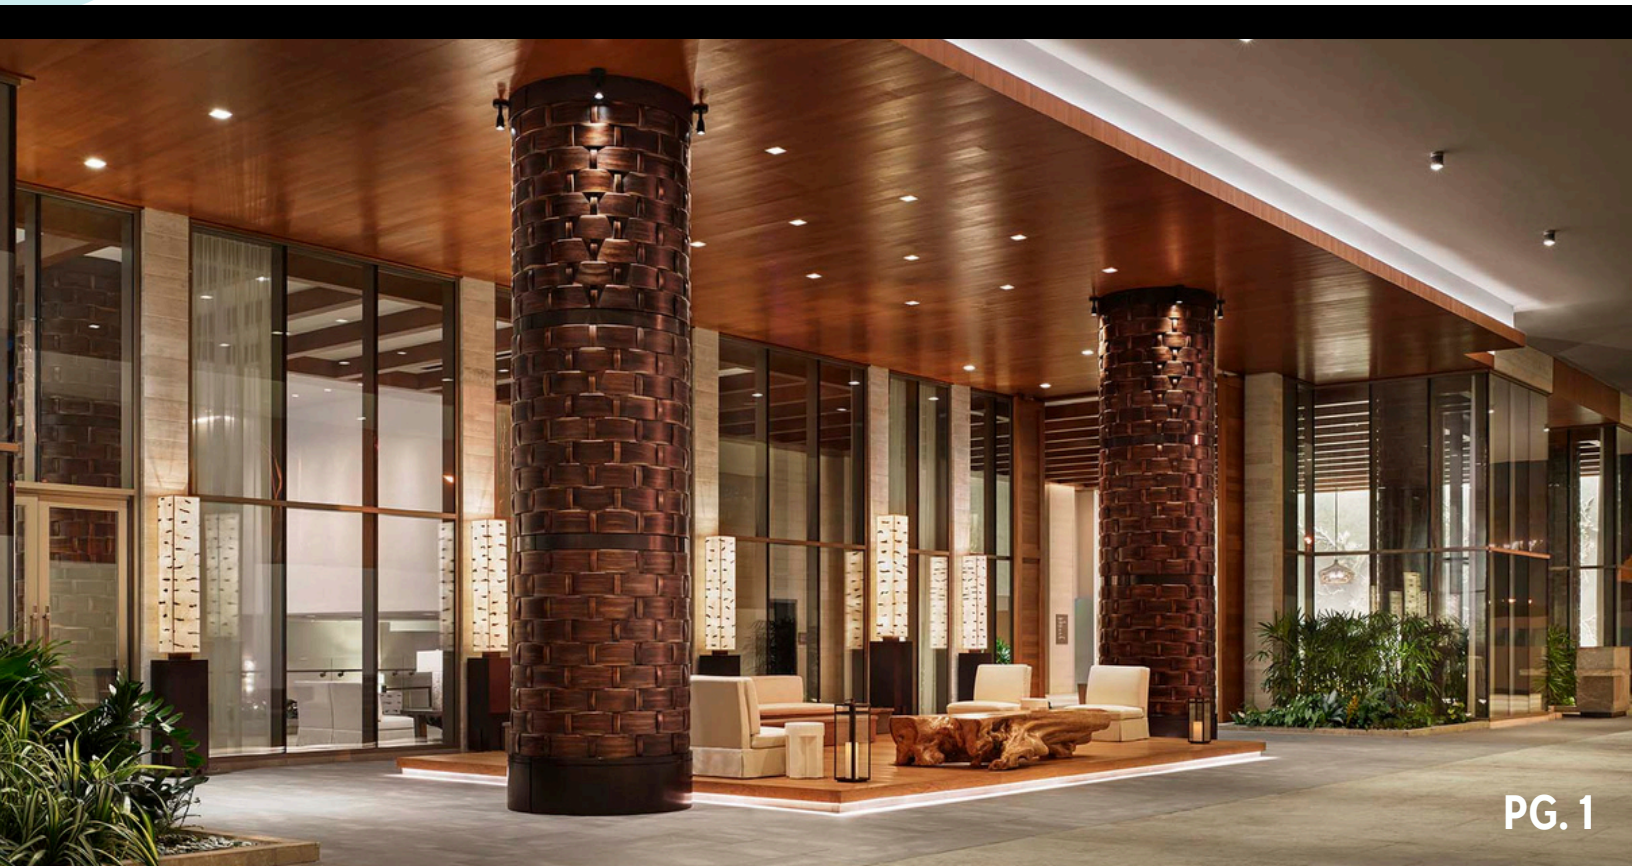

The Hawaii Dental Association Convention & Exhibition 2026 will be held at the
'Alohilani Resort Waikiki Beach

2490 Kalakaua Ave. Honolulu, HI 96815

Parking at the 'Alohilani is \$20 per entry; valet is \$60. No validation.

(Fee is subject to change at the 'Alohilani's discretion)

Due to space limitations please consider rideshare or carpooling.

AIR & LODGING RESERVATIONS

AIR RESERVATIONS

We are pleased to offer air travel discounts on Alaska/Horizon Air/Hawaiian Airlines to Honolulu for our Convention in Jan 2026!

Discount details:

Receive a 5% discount off Alaska Airlines published fares (except companion and other promotional fares).

Departure City(s): Any Alaska Airlines/Horizon Air/Hawaiian Airlines US city

Meeting City: Honolulu, Hawaii (HNL)

Not Included: Alaska, Canada, Mexico or Central America

Beginning Travel Date: Fri, January 9, 2026

Last Travel Date: Fri, January 23, 2026

Blackout dates: None

Discounts are valid on all flights marketed by Alaska Airlines and operated by Alaska Airlines, Hawaiian Airlines, Horizon Air or SkyWest. Not valid on sub-contracted code share flights.

Not valid for interisland flights.

Any change or cancellation after ticketing is subject to a service charge. All fare rules and additional blackout dates of the fare apply. Please verify all current baggage allowances and fees as well as travel policies on www.alaskaair.com prior to travel.

How to book:

All tickets must be issued online or by calling the Alaska Airlines Group Desk (800-445-4435). A \$15.00 per person service fee will apply to any tickets issued by the Group Desk. If you have questions about the Discount Code, please contact the Group Desk at 800-445-4435. Alaska Airlines Group Desk hours of operation are Monday through Friday 6am-6pm PST, Saturday 7:30am-6pm PST, closed Sunday. (Please note the time zone difference with Hawaii.)

Or, use our Discount Code **ECMO341** to book online at alaskaair.com and input the Discount Code when searching for flights. The discount will be applied to any flights meeting our fare rules. By clicking the “?” next to the discount code box after entering the code you may view a detailed description of these rules.

AIR & LODGING RESERVATIONS

continued

HOTEL RESERVATIONS

We are pleased to offer a limited block of rooms at the Alohilani Resort Waikiki Beach.

Room rates: Our group room rate is \$249/night for single and double occupancy. The triple and quad rates are \$349/night and \$449/night, respectively.

Resort fee: As with most hotels, there is a resort fee. We are receiving the discounted resort fee of \$20/daily.

Confirmation Letters: The confirmation letters you will receive after booking will show the retail resort fee, but note that this will be adjusted to the daily group rate of \$20.00 at check-in. Unfortunately, this field cannot be modified in our confirmation template. (It might take a few hours or a day for the confirmation letter to arrive in your email.)

Reservation Security: A credit card is required to secure the reservation, but payment will only be processed at check-out. No prepayment is needed.

Cancellation Policy: You can cancel or modify your reservations up to 72 hours before arrival.

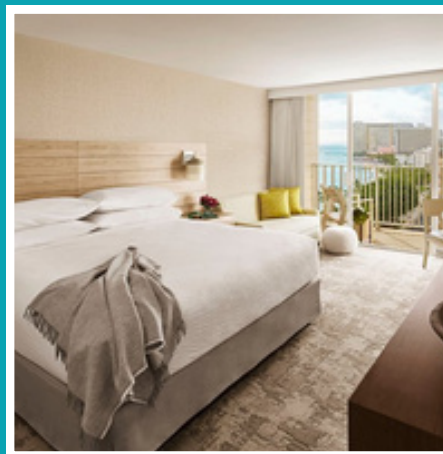

Cut off: Book before December 14TH!

Pre & Post stays: Make it a staycation! Our group booking allows you to stay 3 three days pre/post of the convention, subject to availability. You can check in as early as Sun Jan 11 and check out as late as Sun Jan 18.

Ready to Book:

Please make your reservations as soon as possible as we have a limited number of rooms; click on this link to start: **Reservation Link** or you can visit the <https://www.alohilaniresort.com/> and enter the **GROUP CODE: DENTAL**

The link provided gives you direct access with the code already populated. If accessing through the hotel website, you will need to manually enter the code and dates. The code must be entered in the "Group Code" field during the initial search to access the group rate. If modifying a reservation, the code must be re-entered. Modifying without the correct group code will display public rates, not the exclusive group rate.

BASIC LIFE SUPPORT FOR HEALTHCARE PROVIDERS

7:30 am - 10:30 am
2:00 pm - 5:00 pm
Fast CPR

This comprehensive on-site Basic Life Support (BLS) training provides you with critical emergency medical skills. Our instructor will deliver a hands-on, interactive training to prepare you to respond effectively to medical emergencies.

Training Highlights

- Meets American Heart Association (AHA) certification standards
- Includes comprehensive CPR and emergency response techniques
- Practical, scenario-based learning with professional medical equipment
- Certification valid for two years upon successful completion

What Participants Will Learn

- Adult, child, and infant CPR techniques
- Automated External Defibrillator (AED) usage
- Choking rescue procedures
- Team dynamics and two men rescue skills.

AHA BLS Provider Ebook included with training.

This comprehensive AHA digital resource is designed specifically for healthcare professionals seeking to obtain or renew their Basic Life Support (BLS) certification. The ebook provides a comprehensive, user-friendly guide that breaks down critical life-saving techniques, protocols, and best practices for emergency cardiovascular care.

AGD Subject Code: 142
Delivery Method: Participation
CE Credits: 3.0

Please note that this course repeats Wednesday and Friday

HELPING THE MODERN DENTAL PRACTICE RECOGNIZE CERTAIN ETHICAL ISSUES

8:00 am - 11:30 am
12:30 pm - 4:00 pm
Mr. Sean Murphy

This course discusses some of the ethical issues currently facing dental practices, and provides attendees with options to consider for these various ethical issues. The format for the course, which involves real world hypotheticals, is meant to be both entertaining and engaging.

Learning Objectives: Learning objectives include, but are not limited to, options to consider for such issues as: requests for inappropriate treatments, furnishing dental records, disclosing conflicts of interest, and dental marketing.

AGD Subject Code: 555
Delivery Method: Lecture
CE Credits: 3.0

Please note that the afternoon course is a repeat of the morning course.

FROM HIRE TO SEPARATION: MANAGING THE EMPLOYMENT LIFE CYCLE

8:30 am - 10:30 am
Mr. Chris Yeh

This course addresses considerations and practice pointers in managing the hiring process (e.g., job interviews, pre-hire medical examinations, “working interviews”), employment agreements (e.g., arbitration, confidentiality, non-solicitation), legal issues that might arise during employment (e.g., harassment complaints, leave of absence, accommodation requests), and separation (e.g., termination, job references). This course will also address the assessment of whether a worker is an employee or an independent contractor.

Learning Objectives: Attendees will learn how to minimize employment-related legal risks in their dental practices.

AGD Subject Code: 550
Delivery Method: Lecture
CE Credits: 2.0

AIRPOLISHING FOR NON-SURGICAL PERIODONTAL THERAPY

9:00 am - 11:00 am
Dr. Ryan Yim

This course explores the role of air polishing technology in non-surgical periodontal therapy, with a focus on its integration into contemporary biofilm management strategies. Participants will learn how advances in air polishing powders, delivery systems, and clinical protocols have transformed patient care—offering minimally invasive, efficient, and comfortable alternatives to traditional debridement methods. Through evidence-based discussion and case applications, the course highlights how guided biofilm therapy principles enhance outcomes for periodontal maintenance, supportive therapy, and peri-implant health.

Learning Objectives: Attendees will understand the scientific basis of air polishing in periodontal and peri-implant therapy, including mechanisms of action and biofilm disruption. They will differentiate between air polishing powders (e.g., glycine, erythritol, sodium bicarbonate) and their indications, contraindications, and effects on hard/soft tissues. Attendees will learn about the efficacy and applications for using an air polisher. They will also learn a general protocol for use of an air polisher for non-surgical periodontal therapy.

AGD Subject Code: 490
Delivery Method: Lecture
CE Credits: 2.0

DENTAL, MENTAL, MINDFUL: PROMOTING UNDERSTANDING AND HEALING IN OUR PERSONAL AND PROFESSIONAL LIVES

11:30 am - 1:30 pm
Dr. Mestisa Gass

The slides will use a simple 4 color template with an overarching theme of sharks. The shark theme represents, and will be briefly discussed at the start of the presentation and throughout, a creature that brings things from the depths into the light. So we will be learning about mental health, assessing ourselves for places of growth, learning skills to use with ourselves or someone in crisis, and identifying who to call when in need. The shark will help us identify our own depths and need for self-care.

Learning Objectives: Attendees will: 1) Briefly discuss the current landscape of mental health and the impact on the dental profession. 2) Introduce a framework for assessing and improving mental health. 3) Identify key changes to foster a mental health culture and gain skills. 4) Review national and state specific crisis supports.

AGD Subject Code: 770
Delivery Method: Lecture
CE Credits: 2.0

PREVENTING WORKPLACE VIOLENCE IN HAWAII-BASED DENTAL PRACTICES: TO DO AND WHAT NOT TO DO!

12:00 pm - 1:30 pm
Mr. Anthony Lang

This discussion will analyze actual case studies to address workplace violence indicators and possible offenders who may commit acts of violence in a Hawaii-based dental practice. Then, we will look at action/flash points which may trigger workplace violence and the appropriate steps to address these hot spots. We will then conclude with talking points on intervention practices and ultimate prevention steps, culminating in a possible workplace violence action plan.

Learning Objectives: 1) identifying signs of potential violence; 2) understanding the different types of violence and perpetrators; 3) recognizing escalating situations; 4) de-escalating possible conflicts; 5) implementing appropriate response strategies; and 6) reporting incidents properly - all with the goal of creating a safe environment within a dental institution.

808NOVAPE: ENDING THE YOUTH VAPING EPIDEMIC

2:30 pm - 4:00 pm
Mr. Kevin Ramirez

Youth vaping in Hawai'i peaked among high school students in 2019 and has continued to remain prevalent in 2026. While e-cigarette use continues at the high and middle school levels, in the past two years the issue has become rampant in our elementary schools. This presentation will cover the beginning of the tobacco epidemic in the United States from its inception with cigarettes over 100 years ago, up to today's most popular tobacco product for youth, the electronic cigarette. The course will also cover some of the strategies used by the Coalition For A Tobacco-Free Hawai'i to reduce the impact of tobacco products on our community.

Learning Objectives: Participants will learn: 1) About the history of tobacco prevention and control work. 2) The history of the e-cigarette and the various innovations in the technology over the years. 3) About different tobacco products and how their use can negatively impact oral health. 4) About the current policy and advocacy efforts of the Coalition For A Tobacco-Free Hawai'i.

MEDICAL EMERGENCIES IN THE DENTAL OFFICE: PREVENTION, PREPAREDNESS, AND PROTOCOLS

3:00 pm - 4:30 pm
Dr. Eva Kiezik

Medical emergencies can occur unexpectedly in any dental setting, making preparedness essential for patient safety. This presentation reviews the concepts and skills to identify and manage the most common medical emergencies encountered in practice, including syncope, allergic reactions, seizures, hypoglycemia, and cardiac events. Participants will review emergency protocols, proper use of emergency drugs and equipment, and strategies for effective team response and prevention.

Learning Objectives: By the end of this presentation, participants will be able to recognize, assess, and manage the most common medical emergencies that may occur in a dental setting, with emphasis on prevention strategies, emergency protocols, and the effective use of emergency equipment and medications.

3 STEPS TO TREAT SLEEP APNEA IN YOUR DENTAL PRACTICE

8:00 am - 10:00am
Mr. Michael Cowen

Obstructive sleep apnea (OSA) is more than just snoring—it's a serious health issue that affects millions, including many of your patients. Since 2017, the American Dental Association (ADA) has recommended that all dentists screen for Sleep-Related Breathing Disorders (SRBD). If you're not screening, you're missing a chance to improve lives, grow your practice, and add a valuable new service.

In this hands-on session, you'll learn how to spot the signs of OSA, use simple screening tools in your daily routine, and confidently guide patients through sleep testing. But success in dental sleep medicine (DSM) isn't just about screening—it's about having a well-trained team. We'll show you how to get your team involved in patient education, case acceptance, and follow-up to ensure better results.

You'll also learn how to make sleep a profitable part of your practice by building strong referral relationships and streamlining your workflow. You'll leave with a clear plan to help more patients, grow your reputation, and become a leader in dental sleep medicine.

Learning Objectives: 1) Define Obstructive Sleep Apnea and the impact on the patient's health and dentition. 2) Understand the ADA's 2017 guidelines on the scope of the dental professionals. 3) Learn effective screening methods to identify patients at risk for OSA. 4) Train your team to improve patient education and case acceptance. 5) Develop a step-by-step system to add sleep to your practice.

DIGITAL IMPRESSIONS EXPLAINED - COMPARE, CONTRAST AND MASTER THE CRITICAL FOUNDATION OF PRECISION DENTISTRY

8:00 am - 11:30 am
Dr. Jonathan Ng

Whether you are new to digital workflows or looking to refine your technique, this course equips the general practice with the knowledge and practical skills to confidently master digital impressions in daily practice. This lecture demystifies digital impressions for the general practice, offering a clear comparison with traditional methods and a deep dive into the latest scanning technologies. Attendees will explore how digital impressions serve as the bedrock of precision dentistry, enhancing workflow efficiency and clinical outcomes. The session will also highlight the growing role of artificial intelligence (AI) in digital impression systems, including automated steps and scan optimization.

Learning Objectives: Upon completion, participants will be able to: Compare and contrast digital and traditional impression techniques, understanding their respective advantages and limitations for general dentistry. Identify and evaluate different intraoral scanners and their applications across a range of general dental procedures. Describe the impact of AI-driven features in digital impression systems on accuracy, efficiency, and diagnostic capability. Apply best practices and clinical tips for capturing accurate, reliable digital impressions in routine and complex cases.

GREEN DENTISTRY: CANNABIS & ORAL HEALTH

9:00 am - 11:00 am
Dr. Barry Taylor

Marijuana, also known as Cannabis, is the most common used illicit drug in the United States. Thirty-five states currently have legalized marijuana for medicinal purposes, while over 20 states have legalized it for recreational use. It is estimated that over 10% of the US population uses marijuana at least once a year.

This course is an unbiased and evidence-based presentation of marijuana and its role in dentistry. We will present an introduction to the history of marijuana and trends pertaining to its use. Next, we will provide a basic science review regarding the Cannabis plant, the drug marijuana, and the Endocannabinoid System. We will review how marijuana use affects oral and general health. Finally, we will address areas of possible dental research related to cannabinoids.

At the conclusion of the course the participants will:

1. Comprehend the Endocannabinoid System, what cannabinoids are, and how marijuana is connected.
2. Understand how marijuana affects oral health – specifically detailing oral pathology, dental caries, and periodontal disease
3. Understand how marijuana affects our patient's general health and provide information of possible interactions of marijuana with commonly prescribed medications
4. Learn how to communicate with patients regularly using marijuana
5. Explore future areas of research with cannabinoids in regard to anxiolysis, bone metabolism, wound healing, and inflammation.

HOW DENTISTS TREAT SLEEP APNEA AND MAKE MONEY

11:00 am - 1:00 pm
Mr. Michael Cowen

Effective oral appliance therapy (OAT) isn't just about handing a patient a device—it's about understanding the science of sleep, mastering treatment planning, and ensuring patients use the therapy you provide. While CPAP is often prescribed as the first-line treatment for obstructive sleep apnea (OSA), studies show that nearly half of patients stop using CPAP after 90 days. That's where dentists step in.

According to the American Academy of Dental Sleep Medicine (AADSM), dentists are uniquely qualified to provide oral appliance therapy, making them essential partners in sleep apnea care. In this session, you'll understand the patient's treatment options for OSA, select the right appliance for each patient, and learn about the dental sleep medicine business model.

But successful treatment doesn't end with the appliance—you also need a well-trained team, a clear workflow, and strong referral relationships to ensure patient follow-through and long-term success. You'll leave this session with the clinical confidence to treat sleep apnea effectively and the business strategy to make sleep a thriving part of your practice.

Learning Objectives: 1) Explore the patient's various treatment modalities for OSA. 2) Identify candidacy for oral appliance therapy. 3) Learn mechanism and principles of oral appliance therapy. 4) Develop a streamlined workflow from diagnosis to long-term follow-up. 5) Define the business models for a dentist treating sleep in their practice.

EVERYTHING YOU NEED TO KNOW ABOUT DIGITAL DENTISTRY TO TRANSFORM PRACTICE FOR THE GENERAL DENTIST

1:00 pm - 4:30 pm
Dr. Jonathan Ng

This comprehensive lecture is designed for the general dentist eager to embrace the digital transformation sweeping the dental profession. Covering the full spectrum of digital technologies—from diagnostics and treatment planning to CAD/CAM restorations and 3D printing—this session demonstrates how digital workflows can elevate patient care and practice efficiency. Special emphasis will be placed on the integration of artificial intelligence (AI) in digital dentistry, including AI-powered diagnostics, treatment planning, and restorative design. General dentists will leave with actionable strategies and a clear roadmap for integrating digital and AI innovations into their own practices.

Learning Objectives: Upon completion, participants will be able to: 1) Identify the essential components of the digital dental workflow, including imaging, design, and fabrication technologies relevant to general dentistry. 2) Evaluate the clinical and operational benefits of digital and AI integration in preventive, restorative, and prosthetic dental care. 3) Discuss current and emerging applications of AI in digital dentistry and their impact on diagnostics, planning, and patient outcomes. 4) Develop a personalized implementation plan for adopting digital and AI-driven solutions to enhance practice efficiency and patient care.

WELLNESS FOR THE ORAL HEALTH CARE PROVIDER

2:00 pm - 4:00 pm
Dr. Barry Taylor

According to the 2021 ADA Wellness survey, 16% of dentists experience anxiety. Dentists younger than 40 years old were more likely to score higher on the depression risk assessment questions than older dentists and have lower self-competence. Dr Barry Taylor uses his own personal story and journey through depression to wellness in this evidence-based presentation on wellbeing. In addition to learning about how mental illness can affect a dentist's clinical ability, Dr. Taylor will discuss many preventive measures that one can take to get to and stay in a healthier environment. Additionally, Dr. Taylor will discuss how to communicate and help others who may be experiencing a mental health crisis.

Course objectives

1. Understand how mental health affects clinical decisions
2. Understand the role of nutrition and exercise in maintaining good mental health
3. Learn how to address stress and maintain a healthy lifestyle
4. Learn how to communicate with others who are experiencing a mental health crisis

ORTHODONTICS IN COLLABORATIVE DENTAL CARE: LEVERAGING AI & ADVANCED TECHNOLOGY FOR INTERDISCIPLINARY TREATMENT PLANNING

2:30 pm - 4:00 pm
Dr. Sean Holliday

This comprehensive lecture examines how modern orthodontic practice leverages cutting-edge digital technologies to facilitate collaborative care with restorative dentists and specialists. Attendees will learn how AI-powered tools, digital smile design workflows, and remote patient monitoring systems are transforming interdisciplinary treatment planning and enhancing patient outcomes. The presentation will demonstrate practical applications of these technologies through real case studies, showing how multidisciplinary teams can better coordinate with restorative dentists, periodontists, orthodontists, and oral surgeons using digital platforms. Participants will gain actionable insights into implementing these digital workflows to improve communication, treatment predictability, and patient satisfaction in complex multidisciplinary cases.

Learning Objectives: Upon completion of this lecture, participants will be able to:

1) Identify key digital technologies (CBCT, intraoral scanning, AI tools) that enhance communication between orthodontists and interdisciplinary team members in complex treatment planning. 2) Describe how digital smile design (DSD) workflows integrate orthodontic treatment with restorative and esthetic outcomes to improve collaborative case management. 3) Evaluate the role of AI-powered diagnostic and monitoring tools in orthodontic treatment planning and their impact on interdisciplinary care coordination. 4) Implement patient monitoring systems and digital communication protocols to enhance treatment efficiency and patient compliance in collaborative care settings. 5) Develop strategies for integrating digital workflows into practice while maintaining effective communication with interdisciplinary teams of restorative dentists, orthodontists, and other specialists. 6) Apply technology-enhanced patient communication tools to improve treatment acceptance and understanding in complex interdisciplinary cases.

ELEVATING YOUR POSTERIOR COMPOSITE RESTORATIONS: AN EVIDENCE BASED WORKFLOW SYSTEM FOR CONSISTENT CLINICAL EXCELLENCE

8:00 am - 11:30 am
Dr. Alan Atlas

Direct Class II posterior composite restorations remain among the most technique-sensitive procedures in restorative dentistry. Despite their widespread use, outcomes often fall short of the longevity associated with traditional amalgam restorations, largely due to the absence of standardized, evidence-based clinical protocols.

This course bridges the gap between emerging scientific research and practical, real-world application. Participants will explore a streamlined, evidence-based workflow designed to enhance the predictability, efficiency, and long-term success of posterior composite restorations. Clinical techniques will be demonstrated with high-definition dental microscope video, offering an immersive, detailed view that supports both understanding and implementation. By the end of this course, attendees will be equipped with the knowledge and skills to optimize their Class II composite restorations, improve patient outcomes, and elevate practice profitability.

Learning Objectives: 1) Analyze current scientific evidence identifying key factors that contribute to the failure of direct Class II posterior composite restorations. 2) Apply advanced clinical protocols—from preparation through final polish—to consistently achieve precise margins, ideal proximal contacts, and eliminate post-operative sensitivity. 3) Incorporate innovative, research-supported techniques to optimize the workflow for direct Class II restorations, with applications extending to Class I and Class V restorations. 4) Improve clinical efficiency and profitability by adopting evidence-based methods and eliminating reliance on materials lacking robust clinical validation. 5) Develop effective patient communication strategies to educate on maintenance, manage expectations, and reduce the risk of dissatisfaction or litigation.

FRIDAY, JANUARY 16TH, 2026 - CONTINUED

RDH TOOLKIT

8:00 am - 10:00 am
Ms. Amber Auger

How we decontaminate the oral cavity matters. The demands of fast-paced lifestyles have increased our patient's oral diseases. In order to be effective in our chairside treatments, having updated technologies is requisite. This course is designed for attendees to review the latest techniques, how they improve patient care, and how they reduce stress on the clinician.

Learning Objectives: Review 5 steps to increase case acceptance and behavior change for enhanced treatment outcomes. Discover how the latest technologies are used to decrease the stress on the body of the RDH and refine the patient experience. Identify products to meet the patient's needs.

AGD Subject Code: 149
Delivery Method: Lecture
CE Credits: 2.0

PROFITABLE COLLABORATIVE CARE

11:00 am - 1:00 pm
Ms. Amber Auger

Dental hygienists hold the key to your practice's success, with nearly 80% of the practice revenue coming from their chairs. This program aims to develop a foundation for exceptional leadership skills to create a true partnership with the dental hygienist. This program will encourage a unique method of partnership to transform employees into practice stakeholders.

Learning Objectives: Attendees will: 1) Learn techniques to create a positive culture of trust and respect. 2) Learn how to be sure your hygienists and dentists are aligned. 3) Evaluate how to establish an effective communication style with the RDH. 4) Identify the critical components of an effective workflow for preventive care. 5) Discover five best practices in "hand-offs." 6) Learn how to effectively set goals and action plans to maximize revenue. 7) Review how to create and implement a schedule to maximize revenue.

FROM PLANNING TO PLACEMENT: STEP-BY-STEP WORKFLOWS TO RESTORATIVE EXCELLENCE

12:30pm - 4:00 pm
Dr. Alan Atlas

This course explores the transformative role of digital technologies in dentistry, with a focus on CAD/CAM fabrication of ceramic restorations. While digital advancements have revolutionized efficiency in design and fabrication, long-term success depends on a comprehensive understanding of factors unique to these technologies. Participants will explore evidence-based strategies for treatment planning that integrate contemporary ceramic materials with both digital and conventional workflows. Step-by-step techniques for achieving predictable esthetic and functional results will be illustrated through high-definition dental microscope video. Grounded in the latest scientific research, this course offers a comprehensive and practical approach to crown and bridge workflows—covering every stage from tooth preparation, conventional or digital impressions to final cementation—for ceramic crowns, bridges, inlays, onlays, and veneers as well as traditional PFM and full cast gold crowns.

Learning Objectives: By the end of this course, participants will be able to: 1) Identify key factors within the digital workflow that impact marginal fit and contribute to the premature failure of indirect ceramic restorations. 2) Demonstrate comprehensive clinical protocols for anterior and posterior ceramic and metal-based restorations—including treatment planning, tooth preparation, conventional or digital impression options, and final cementation. 3) Understand the appropriate materials and techniques for foundational core buildups to ensure structural reinforcement prior to tooth preparation. 4) Evaluate risk factors, select appropriate post-and-core systems and restorative materials, and apply crown preparation guidelines for restoring severely compromised endodontically treated teeth. 5) Implement innovative, efficient, and tooth-preserving workflows that integrate restorative treatment seamlessly with endodontic therapy. 6) Master step-by-step preparation techniques for all-ceramic crowns, veneers, inlays, and onlays, utilizing high-definition dental microscope video to ensure precise and clearly defined finish lines. 7) Apply evidence-based smile design principles to guide esthetic treatment planning for veneers and comprehensive full-mouth rehabilitations.

Delivery Method: Lecture
CE Credits: 3.0

DENTAL ETHICS

1:00 pm - 4:30 pm
Mr. Arthur Curley

This Dental Ethics Program is based on the ADA Principle of Ethics and Code of Professional Conduct. The speaker will review topics that include patient autonomy, beneficence, justice and veracity principles and will comply with the Hawaii Board of Dentistry every two-year requirement, per Hawaii Revised Statutes 448-8.5. The speaker will offer tips and guidance on compliance with ethical requirements.

Learning Objectives: Course attendees will learn to: 1) Recognize the scope of current ethical issues in a dental practice. 2) Avoid or prevent clinical ethical problems in practice. 3) Educate associates and staff on how to resolve clinical ethical issues or problems if they occur.

AGD Subject Code: 555
Delivery Method: Lecture
CE Credits: 3.0

Please note that this is a different course from the Wednesday sessions.

Shaping a Safe Future:

Optimizing Care with Patient Education and Team Training

The Dentists
Insurance
Company

This seminar focuses on essential risk management strategies, empowering dentists with the skills and resources to address key factors that optimize patient outcomes and mitigate potential liabilities. Through evaluation of actual TDIC cases, this seminar explores the importance of establishing protocols to enhance patient safety. It also covers best practices for obtaining current and past health histories, insights on essential staff roles and training, and steps for responding to office emergencies.

Date: January 16, 2026
Time: 8:30 a.m. – 11:30 a.m. (HST)
Location: In person at Alohilani Hotel

After completion of this course, you will be able to:

- Understand the significance of establishing and adhering to protocols and the importance of staff training for medical emergencies.
- Recognize your role in providing patient education to achieve optimal levels of care and patient compliance.
- Incorporate controls and procedures to reduce the potential for errors in documentation and increase patient safety.

This course qualifies for **3 CE units ADA CERP** and a **5% Professional Liability premium discount.***

Daniel C. Freeman, DDS

Dr. Freeman earned his dental degree in 1984 from the University of the Pacific, Dugoni School of Dentistry, San Francisco. From 1989 – 2018, he held various professional positions, including Chairman of the Public Affairs Committee, Dental Care Committee, Consultant/Instructor Basic Life Support Committee and as a Board Member at Large, with the Marin County Dental Society. For 38 years Dr. Freeman maintained a successful private solo general practice, while also dedicating his time to volunteering in organized dentistry at both local and state levels. Dr. Freeman was concurrently on the dental faculty at the University of the Pacific school of Dentistry for twenty-two years. He continues to nurture his passion for teaching and education. Since 1994, he has served as an expert consultant, educator and dental mentor.

Art Curley, Esq.

Mr. Curley is a senior trial attorney in California. After graduating from the University of California, Berkeley with honors in 1970, he obtained his J.D. in 1974 from the UC College of Law, San Francisco. He is currently an Assistant Professor of Dental Jurisprudence at the Arthur A. Dugoni School of Dentistry in San Francisco and an Adjunct Faculty Professor at the University of California, San Francisco. As a trial attorney, he has been defending doctors for over 49 years and has presented risk management courses throughout the United States and Canada. He is an associate of the American Board of Trial Advocates. Mr. Curley has published several articles on risk management and authored chapters in numerous text books on oral surgery, endodontics and periodontics.

*THIS DISCOUNT IS FOR THE PURPOSE OF SOLICITING SALES OF INSURANCE PRODUCTS. Void where prohibited. Not available in all states. Speakers

ALAN ATLAS, DDS

Dr. Alan Atlas maintains a full time private practice dedicated to comprehensive and esthetic dentistry located in Philadelphia, Pennsylvania. He is Director of Restorative Microscopy and holds a dual appointment as Clinical Professor in the departments of Endodontics and Preventive/Restorative Sciences at Penn Dental Medicine. His presentations span worldwide and continually at all major meetings in the United States.

AUDREY AUGER, MPH, RDH

Amber Auger, MPH, RDH, has 25 years of experience in the dental hygiene industry. She is a practicing dental hygienist, corporate consultant, and RDH coach. Amber is the creator of Thrive in the OP®, a membership course that includes both on-demand sessions and weekly coaching. Thrive in the OP® equips dental hygienists with clinical, business, and leadership capabilities outside of their traditional hygiene degree.

Amber is the recipient of the 2019 Award of Distinction for her work in public health. She has been to 5 different countries to provide preventive dental hygiene services. Amber is a monthly columnist with RDH Magazine, fractional hygiene director, and an international lecturer. Amber is known for incorporating humor into her educational content and a practical approach to implementing the latest science into your workflow. The vast content that Amber provides through virtual, in-person events and group and one-on-one coaching will leave you inspired, empowered, and equipped to conquer your career goals. She can be reached at ambraugerrdh@gmail.com

MR. MICHAEL COWEN

Driven by a profound passion, unwavering dedication, and a wealth of education, Michael Cowen has been saving lives and reshaping the sleep medicine landscape since 2003. Inspired by his daughter's triumphant battle with Obstructive Sleep Apnea, he became an expert in developing innovative sleep centers and home sleep tests in collaboration with physicians. In 2015, Michael established Awaken2Sleep, a company that helps dentists pivot to the practice of their dreams through sleep business coaching, mentoring, and a mastermind community committed to excellence.

EVA KIEZIK, DMD

Eva P. Kiezik, DMD, was born in Poland and immigrated to Manhattan when she was 10 years old. She prides herself on her empathy and feels that her biggest strength is her ability to adapt to her patients' needs. With a lifelong passion for helping people and a love for mission trips and travel, pursuing a career in medicine was a natural fit for her. She decided to go into oral surgery because oral surgery is the most challenging level of dentistry you can pursue, and Dr. Kiezik loves to be challenged by a career that demands continuous learning.

Dr. Kiezik is rewarded every day by her ability to transform people's lives for the better with life-altering treatments and is thrilled to be practicing in Hawaii with the Oral Surgery Hawaii team. She loves the food, the community, and the incredible diversity of cultures here. She would like her Oral Surgery Hawaii patients to know that having come from a multicultural background, she is able to understand where a lot of people are coming from and anticipate their needs and help them with any anxiety they may be feeling about their procedures, and she is willing to take the time to address her patients' questions and concerns. For Dr. Kiezik, it's all about providing an outstanding patient experience, so she is committed to giving you all the time and information you need to feel as comfortable and at ease as possible.

MR. TONY LANG

Tony Lang serves as the Federal Bureau of Investigation (FBI) Chief Division Counsel (CDC) and Supervisory Special Agent (SSA) for the Honolulu Division. Tony previously served as the CDC/SSA for the FBI Seattle Division and as the Senior Field Legal Counsel for the FBI Office of the General Counsel in Washington, D.C. He began his career as an FBI Special Agent in November 1996 at the Washington D.C. Field Office where he investigated counterterrorism, criminal, and counterintelligence cases. He holds legal bar memberships in the state of Pennsylvania and the District of Columbia; and graduated from the Johns Hopkins University and the University of Chicago. Tony is an avid cyclist and swimmer!

SEAN MURPHY, CAE

Sean Murphy is a Certified Association Executive (CAE) who currently serves as the CEO for the Harris County Medical Society (HCMS). HCMS is the country's largest county medical society, representing approximately 15,000 Texas physicians in the Houston area. In his role, Sean works with the 24-person HCMS team to provide advocacy, financial savings, informational resources, continuing education, and valuable benefits to Texas physicians and their practices. Prior to joining HCMS, Sean served as the Executive Director for the Arizona Dental Association (AzDA) and previously as the Vice President of Advocacy and the General Counsel for the American Association of Orthodontists (AAO), and as a result, brings with him a wealth of association and advocacy experience. Sean has lectured throughout North America on various dental topics, many involving the business and legal aspects of running a practice. Sean obtained his Juris Doctor (JD) from Saint Louis University School of Law, where he also obtained his Health Law Certificate.

JONATHAN NG, BMedSc, DDS, MSc, Dip. Pros., FRCD(C)

Dr. Ng is a Certified Specialist in Prosthodontics. He is currently an Assistant Clinical Professor at the UBC Department of Dentistry and is also on staff as a clinical Prosthodontist at the BC Cancer Agency in Vancouver delivering multifaceted prosthodontic care and oral and facial rehabilitation to medically complex patients.

Dr. Ng's private practice is on West Broadway in Vancouver, Canada. He focuses his private practice on esthetic and functional reconstruction ranging from the single tooth situation to complex prosthodontics. His practice includes the surgical placement and restoration of dental implants. He has a passion for the area of digital dentistry such as digital impressions and the digital workflow and has been invited to speak both nationally and internationally on these topics. He has published articles on the subject area.

Dr. Ng has been involved in international aid missions with a strong desire to help those in underdeveloped countries. When not practicing dentistry, he enjoys photography, playing the guitar and snowboarding.

MR. KEVIN RAMIREZ

Kevin Ramirez joined the Hawai'i Public Health Institute in January 2017 as the coordinator of the 808NOVAPE Prevention Campaign and provided youth vaping prevention services, support, and resources to Honolulu County schools, educators, and community members. Since 2023, Kevin has been the program manager for the Coalition For A Tobacco-Free Hawai'i, managing the statewide coalition of organizations and individuals to coordinate policy, advocacy, and educational efforts.

BARRY TAYLOR, DMD, CAE

Dr. Barry Taylor is the Executive Director of the Oregon Dental Association (ODA) and is a volunteer Clinical Assistant Professor at the Oregon Health & Science University School of Dentistry. Prior to attending the OHSU School of Dentistry, he worked as a research assistant for two years in the field of Neuropsychopharmacology at the U.S. Veteran's Hospital in Portland, Oregon. Dr. Taylor practiced full-time for over 15 years as a general practitioner before joining the OHSU Faculty in 2012. He continued to practice part-time while at the School, before becoming the Executive Director of the ODA in 2020.

VIDEO AND PHOTOGRAPHY DISCLAIMER

When you attend the Hawaii Dental Association Convention (HDAC) program, you enter an area where photography, audio, and video recording may occur.

By entering the event premises, you consent to interview(s), photography, audio recording, video recording and its/their release, publication, exhibition, or reproduction to be used for news, webcasts, promotional purposes, telecasts, advertising, inclusion on websites, or any other purpose by HDAC and its affiliates and representatives. You release HDAC, its officers and employees, and each and all persons involved from any liability connected with the taking, recording, digitizing, or publication of interviews, photographs, computer images, video and/or sound recordings.

By entering the event premises, you waive all rights you may have to any claims for payment or royalties in connection with any exhibition, streaming, webcasting, televising, or other publication of these materials, regardless of the purpose or sponsoring of such exhibiting, broadcasting, webcasting, or other publication, irrespective of whether a fee for admission or sponsorship is charged. You also waive any right to inspect or approve any photo, video, or audio recording taken by HDAC or the person or entity designated to do so by HDAC.

You have been fully informed of your consent, waiver of liability, and release before entering the event.

HAWAII DENTAL ASSOCIATION

GUIDELINES FOR PROFESSIONALISM, SAFETY AND RESPECT

Purpose

The Hawaii Dental Association Convention (HDAC) is dedicated to providing a welcoming, safe, and professional environment for all attendees, speakers, exhibitors, and staff. This Code of Conduct outlines the expectations for behavior to ensure a positive experience for everyone.

Expected Behavior

Professionalism: Treat all individuals with respect and courtesy. Foster a collaborative and supportive atmosphere. Adhere to professional business attire.

Inclusivity: Embrace diversity and avoid discriminatory language, actions, or attitudes.

Safety: Follow all venue safety protocols and instructions from event staff.

Engagement: Participate constructively in sessions, workshops, and networking activities. Be open to learning and sharing ideas.

Privacy: Respect the privacy of other attendees. Do not share personal information without consent.

Unacceptable Behavior

Harassment: Any form of harassment, intimidation, or discrimination is strictly prohibited.

Disruption: Interrupting speakers, sessions, or other attendees' participation is not permitted.

Unauthorized Recording: Do not record, photograph, or live-stream presentations or attendees without explicit permission from the HDA.

Substance Abuse: The use of illegal substances or excessive consumption of alcohol during convention events is forbidden.

Damage to Property: Treat the venue and provided materials with care. Vandalism or theft will result in removal from the event.

No Solicitation: Adhere to the No Solicitation Policy while at HDA events unless previous arrangements have been made with HDA.

Reporting Concerns

If you witness or experience any concerning behavior, please report it immediately to HDA. All reports will be handled confidentially and investigated promptly.

Consequences of Violation

The HDA may take any action deemed necessary, including warning the offender, expulsion from the event without refund, and contacting local authorities if appropriate. Serious violations may result in being barred from future Hawaii Dental Association Convention events.

Agreement

By attending the Hawaii Dental Association Convention, you agree to abide by this Code of Conduct. Mahalo for helping us create a respectful and productive environment for all.

DON'T WAIT!
