OVERVIEW

The purpose of this educational activity is to provide a review of the latest advances and evidence-based treatment approaches in the care of lung cancer patients. Sessions will feature information on surgery, radiation and systemic therapies with case presentations and question/answer sessions with the multidisciplinary team.

LEARNING OBJECTIVES

Upon completion of this activity, participants should be able to:

- Detail recent treatment advances for lung cancer surgery
- Identify appropriate uses and recent advances in radiation oncology for lung cancer including proton therapy and SBRT/ablative therapies
- Describe advances in systemic approaches for treating locally advanced and metastatic lung cancer

WHO SHOULD ATTEND

This activity is designed for physicians and other healthcare professionals caring for patients with lung cancer including, medical and radiation oncologists, pulmonologists, and thoracic surgeons.

***Conference materials will be available on-line.
