

A CME Teaching Activity

Michael P. Federle, M.D., Presents...

Abdominal Imaging: A Comprehensive Review

Designated for SA-CME

This enduring material activity counts towards the SA-CME requirement for the ABR, similar to a SAM activity

Release Date: November 15, 2017 | 9.75 AMA PRA Category 1 Credit(s)TM

About This CME Teaching Activity

This CME activity provides a comprehensive review of some of the major challenges in abdominal imaging. Emphasis is placed on the current roles of CT, MR, sonography and fluoroscopy. In addition, advice on how to utilize clinical decision support tools to generate reports that offer the most specific and clinically useful diagnosis.

Target Audience

This CME activity is designed to educate Radiologists, as well as others who are interested in body imaging.

Scientific Sponsor

Educational Symposia

Accreditation

Physicians: Educational Symposia is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

Educational Symposia designates this enduring material for a maximum of 9.75 AMA PRA Category 1 Credit(s)TM. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

SA-CME: Credits awarded for this enduring activity are designated "SA-CME" by the American Board of Radiology (ABR) and qualify toward fulfilling requirements for Maintenance of Certification (MOC) Part II: Lifelong Learning and Self-assessment.

All activity participants are required to pass a written or online test with a minimum score of 70% in order to be awarded credit. (Exam materials, if ordered, will be sent with your order.) All course participants will also have the opportunity to critically evaluate the program as it relates to practice relevance and educational objectives.

Educational Objectives

At the completion of this CME teaching activity, you should be able to:

- Discuss the role of imaging in the diagnosis, treatment and management of pancreatic, liver and gastrointestinal, and renal disease.
- Discuss the imaging and clinical features that allow radiologists to develop an expert differential diagnosis for many of the most common and important abdominal disorders.
- Discuss the relative merits and application of cross-sectional imaging and fluoroscopy in diagnosing GI disorders.
- Discuss the important current role of fluoroscopy in evaluating patients before and after surgery for obesity, GERD, and esophageal carcinoma.
- Discuss the current medicolegal challenges facing radiologists, and how to avoid them.

No special educational preparation is required for this CME activity.

**AMA PRA Category 1 Credit(s)TM
for this activity may be claimed until November 14, 2020.**

This CME activity was planned and produced by Educational Symposia, a leader in continuing medical education since 1975.

This activity was planned and produced in accordance with the ACCME Essential Areas and Elements.

Faculty

Michael P. Federle, M.D.

Professor and Associate Chair for Education

Department of Radiology

Stanford University Medical Center

Stanford, CA

Program

Session 1

Expert DDX: Cystic Renal Mass

Expert DDX: Cystic and Mucinous Pancreatic Masses

Session 2

Expert DDX: Cystic Liver Mass

Abdominal Hemorrhage: Diagnosis and Management

Session 3

Diffuse Liver Disease Evaluation by CT + MR

Focal Lesions in the Noncirrhotic Liver
(Definitive Dx by CT +/- MR)

Focal Lesions in the Cirrhotic Liver

Session 4

Fluoroscopy in the CT - Endoscopy Era

Complications of Bariatric Surgery - Clinical and Imaging Findings

Postoperative Imaging of Esophageal Cancer

Session 5

Antireflux Surgery: What the Radiologist Needs to Know

EDDx: RLQ Pain

Expert DDX LLQ Pain (Diverticulitis, etc)

Session 6

Malpractice Issues for Radiologists
