Royal Marsden Testicular and Bladder Cancer Meeting – Improving Outcomes with Multidisciplinary Care

Introduction

Dear Colleagues

It is with pleasure that we invite you to participate in a very exciting Testicular and Bladder Cancer meeting. The Urological Oncology Educational Day is an annual event with this meeting alternating with Prostate and Renal Cancers which will next be held in October 2019

Testicular cancer is a disease largely restricted to young adult men whereas bladder cancer affects both sexes at a much later stage in life. Despite their differences they are both previously lethal diseases now characterised by successful outcomes associated with multimodality care combining surgery, chemotherapy and radiotherapy for locally advanced and metastatic disease as well as rigorous surveillance strategies for low stage tumours. In both diseases treatments may be associated with consequences that may impact on quality of life. These include functional and body image issues which may influence treatment decisions. Consequently management is underpinned by a multidisciplinary approach dealing with both effective treatment of the cancer as well as the side effects of treatment. Balancing these, at times, conflicting issues is thus one of the major challenges in caring for patients with these conditions. A specific challenge for clinicians is to ensure that radical therapies, usually requiring a combination of modalities, is appropriately provided to optimise outcome but balanced by the need to avoid overtreatment in selected patients who will experience unnecessary treatment related morbidity. Care is thus underpinned by not only multispecialty management but also tailoring options to individual patients to ensure that the best long term outcome both during and after completion of treatment.

This year we are privileged to have the opening key note address by Mr Suks Minhas who will provide an overview of testicular development and dysgenesis providing an understanding of intra-tubular germ cell neoplasia, crypto-orchidism and subfertility which are all associated with testicular cancer. The afternoon keynote lecture will give an overview of bladder cancer immunotherapy at this present time. As with previous meetings each lecture will be followed by interactive case discussions involving the faculty and audience to highlight treatment dilemmas confronting patients with both these diseases and the pivotal points to be considered in their immediate and long term care.

Conference Aim

The aim of the study day will be to highlight the treatment options for patients with both testicular and bladder cancer. The objective will be to cover both early stage and advanced disease, including the side effects of treatments for advanced disease as well as strategies to identify and manage the subset of patients with early disease who at risk of disease progression.

Topics to Include

Topics covered will include historical perspective of these cancers and how their management has evolved to both improve survival and the consequences of treatment. Case based discussions with expert panels and audience interaction will be used to outline treatment strategies for individual patients with particular emphasis on the contributions of specialists required to achieve the best outcomes in both terms of quality of life and survival.

Target Audience

The talks and discussions will be targeted at a multidisciplinary audience, medical and nursing, trainee and specialist and that at the end of the day attendees will have an up to date understanding of the complex issues and current management strategies for both testicular and bladder cancer.

Programme of Events

08.45	Registration and Coffee	
09.20	Welcome	Chairman: Professor David Nicol Consultant Urological Surgeon/ Chief of Surgery The Royal Marsden NHS Foundation Trust
Morning Session – Testicular Cancer		
09.25	Introduction	Chairman: Professor David Nicol Consultant Urological Surgeon/ Chief of Surgery The Royal Marsden NHS Foundation Trust
09.30	Key Note Address: Testicular dysgenesis – linkages between cancer, fertility and crypt-orchidism	Mr Suks Minhas Consultant Urologist, Imperial College Healthcare Trust
10.00	Case based discussions	Members of the Panel
	a. Case 1 – A 35 year old man with a history of cryptorchidism presents with a small testicular mass	Panel Chairman: Professor David Nicol Consultant Urological Surgeon/ Chief of Surgery The Royal Marsden NHS Foundation Trust
	Topics covered • Diagnosis and assessment • Surveillance and adjuvant therapies • Bilateral testicular tumours • Partial orchidectomy • Fertility problems and options • Hypogonadism	Faculty: Mr Suks Minhas Consultant Urologist, Imperial College Healthcare Trust Dr Alison Reid Consultant Medical Oncologist, Royal Marsden NHS Foundation Trust Dr Aslam Sohaib Consultant Radiologist, Royal Marsden NHS Foundation Trust Mr David Hrouda Consultant Urological Surgeon, Imperial College Healthcare Trust Mr Erik Mayer Consultant Urologist, Royal Marsden NHS Foundation Trust and Imperial College London Dr Anand Sharma Consultant Medical Oncologist, Mt Vernon Cancer Centre Dr Steve Hazell Consultant Uropathologist, Royal Marsden NHS Foundation Trust
	b. Case 2 – A 22 year old man is referred following orchidectomy with a CT demonstrating an enlarged retroperitoneal lymph node	
	Topics covered • Primary RPLND • Implications of chemotherapy • New imaging modalities and their role in staging and treatment • RPLND techniques and complications • Salvage therapies	
12.30	Lunch and Exhibition	

Programme of Events

Afternoon Session – Bladder Cancer

13.30	Introduction	Chairman: Mr. Pardeep Kumar Consultant Urological Surgeon, The Royal Marsden NHS Foundation Trust
13.35	Key Note Address: Immunotherapy for Urothelial Malignancy	To be confirmed Medical Oncologist, The Royal Marsden NHS Foundation Trust
14.05	Case based discussions Case 1 – A 50 year old woman with a history of recurrent UTI is diagnosed with bladder carcinoma <i>in situ</i>. Topics covered • Diagnosis and assessment • Intravesical therapies • Methods of dealing with ‘treatment failure’ • Minimally invasive vs. open exenteration • Sexual function post cystectomy	Members of the Panel Panel Chairman: Mr. Pardeep Kumar Consultant Urological Surgeon The Royal Marsden NHS Foundation Trust Faculty: Dr. Shaista Hafeez Clinical Research Fellow Academic Urology Unit The Royal Marsden NHS Foundation Trust The Institute of Cancer Research
14.35	Tea Break	Mr Arun Sahai Consultant Urological Surgeon Guys Hospital NHS Foundation Trust
14.55	Case 2 – A 65 year old man is diagnosed with G3pT1 TCC bladder. Topics covered • Re-resection and the role of random bladder biopsy • Role of chemotherapy • Radical radiotherapy • Radical surgery • Options for reconstruction	Mr Ben Ayres Consultant Urological Surgeon St Georges Healthcare NHS Trust Other Panellists to be confirmed
	Case 3 – A 74 year old man is diagnosed with recurrent bladder cancer post radiotherapy. Topics covered • Management of bladder symptoms post radiotherapy • Role of further intravesical therapy • Salvage options • Palliation for the inoperable patient	
16.30	Closing Remarks	Chairman: Professor David Nicol Consultant Urological Surgeon/Chief Surgeon The Royal Marsden NHS Foundation Trust

Royal Marsden Testicular and Bladder Cancer Meeting – Improving Outcomes with Multidisciplinary Care

Friday 5th October 2018

Event ID: 677

- ☐ £180 Full Delegate
☐ £120 Trainees and CNSs

Booking Conditions

In order to be registered for the event, full payment of the registration fee must be made with your application, unless an organisation is paying on your behalf. All bookings will be confirmed by email, unless otherwise requested. Please contact us if you have not received confirmation within 5-7 days of submitting your booking. A 50% fee will be charged for cancellations made within 4-6 weeks of the event. For cancellations made within one month of the event, full payment will be due irrespective of whether the delegate attends the event or not.

*Payment by invoice

If your employer has agreed to pay your fees and an invoice needs to be sent, it is essential that you give full details below of the contact name, department and full postal address. If any information is missing, your application will not be processed. If your application form needs to be approved by your finance/ personnel department, please ensure that it is processed and forwarded to us quickly.

Life demands excellence

The Royal Marsden Conference Team

The Royal Marsden Conference Team provides world-class medical conferences, study and training days for The Royal Marsden and other organisations.

In addition to organising and delivering our distinguished programme, we are an experienced and dedicated event management team, who organise conferences both at The Royal Marsden and at venues in London and across the UK. We exceed expectations by taking care of everything from venue sourcing, catering, and audio-visual requirements through to the production of professional and detailed delegate packs. Our team negotiates the best deals for events organisers on venue hire, sponsorship and advertising by using the contacts we've built up over the years.

We really do take the stress out of organising events, and can get involved as much or as little as you want. We also offer venue hire from our high profile facilities at The Royal Marsden in Chelsea.

We're proud to be part of The Royal Marsden and are always looking for ways to enhance the conference experience for delegates.

**We're a team of specialists in
conferences and events management.**
