

OTO71 Otolaryngology Update

Price: \$635.00

Register: (866) 611-5599 or www.AmericanSeminar.com

**Special Association accreditation may vary. See website.*

**Highlights from the 27th Annual Advances in
Diagnosis and Treatment of Sleep Apnea and
Snoring - Atul Malhotra, MD, Edward M. Weaver,
MD, MPH, and Eric Kezirian, MD, MPH**

Recognize the different factors that affect determination of AHI in patients with suspected OSA; Identify biomarkers that may predict comorbid conditions in patients with OSA; Implement guidelines from the American Academy of Sleep Medicine when evaluating adults with OSA who may require referral for surgical consultation; Compare different surgical techniques for treatment of OSA and Optimize the selection of hypopharyngeal surgery technique based on OSA severity and body mass index.

OT 55 - 15

**Vestibular Schwannoma/Pharyngeal Carcinoma -
Taha Jan, MD, William Ryan, MD and Wayne
Koch, MD**

Recognize trends in the prevalence and natural history of vestibular schwannoma; Compare the outcomes of treatment vs observation for patients with vestibular schwannomas; Choose between definitive surgery and definitive chemoradiotherapy for a given patient with human papillomavirus (HPV)- positive oropharyngeal carcinoma; Consider surgical de-escalation protocols for select patients with HPV-positive oropharyngeal carcinoma; Assess the role of HPV in the development of hypopharyngeal squamous cell carcinoma.

OT 55 - 17

**Ethics of Opioids/Tracheomalacia/Vocal Cord
Leukoplakia - Andre S. Chen, MD, Caroline M.
Kolb, MD and Lee M. Akst, MD**

Identify patients at high risk for opioid misuse; Implement strategies for pain management after otolaryngologic surgery to minimize the risk for misuse of opioids; Evaluate and manage severe tracheomalacia in pediatric patients; Summarize the natural history of vocal cord leukoplakia and likelihood of progression to malignancy; Develop strategies for management of vocal cord leukoplakia to optimize oncologic and functional outcomes.

OT 55 - 19

**Sinus Surgery/Health Care-associated
Infections/Eustachian Tube Dysfunction - Greg
Davis, MD, M. Jennifer Derebery, MD and Brian
S. Chen, MD**

Administer preoperative steroids in sinus surgery; Optimize greater palatine injection in sinus surgery; Explain the importance of air changes per hour in the hospital setting; List risk factors of health care-associated infections associated with temperature and humidity; Choose appropriate treatment of patulous eustachian tube dysfunction.

OT 55 - 16

**Vertigo/Meniere Disease and Migraine - Hamid
Djalilian, MD and Calhoun D. Cunningham III,
MD**

Assess for signs and symptoms of BPPV; Distinguish among the features of BPPV variants; Select appropriate treatment strategies, for managing recurrent BPPV; Differentiate between the symptoms of Meniere disease and vestibular migraine; Decide whether conservative or surgical treatment is appropriate for a patient with vestibular migraine.

OT 55 - 18

**Reflux/Postnasal Drip/Allergic Rhinitis - Joel H.
Blumin, MD, Joel H. Blumin, MD; Jonathan Bock,
MD and Christopher M. Long, MD**

Recommend appropriate alternatives to proton pump inhibitors for managing symptoms of laryngopharyngeal reflux; Use appropriate testing modalities for detection of laryngopharyngeal reflux; Differentiate various fundoplication procedures for laryngopharyngeal reflux; Assess for various head and neck disease states in patients with postnasal drip; Choose effective therapeutic agents for the management of allergic rhinitis.

OT 55 - 20

OTO71 Otolaryngology Update

Price: \$635.00

Register: (866) 611-5599 or www.AmericanSeminar.com

**Special Association accreditation may vary. See website.*

**Head and Neck Updates - Jennifer D. Bruening,
MD and Vaninder Kaur Dhillon, MD**

Select appropriate imaging modalities to evaluate a thyroid mass; Manage contrast-associated acute kidney injury and contrast allergy; Weigh the value of molecular testing of thyroid nodules; Evaluate the need for parathyroidectomy; Differentiate types of HPT based on laboratory values, imaging, and molecular testing.

OT 55 - 21

**Rhinology/Otology - Pete S. Batra, MD and David
M. Poetker, MD**

Identify factors that increase risk for failure of functional endoscopic sinus surgery; Develop strategies for identifying the cause of failed functional endoscopic sinus surgery; Evaluate patients with otosclerosis prior to performing stapedectomy; Optimize procedures for performing stapedectomy in patients with otosclerosis; Use clinical practice guidelines to manage cases of high-risk and persistent epistaxis.

OT 55 - 22

**Current Concepts in Otology - Steven A. Harvey,
MD and David R. Friedland, MD**

Choose appropriate medications for patients with MD; Advise patients on dietary strategies that may relieve symptoms of MD; Match patients with hearing loss with suitable hearing assistance devices; use imaging to identify patients with SSNHL; Select appropriate treatments for patients with SSNHL.

OT 55 - 23

**Current Trends in Otolaryngology - Sophie G.
Shay, MD, Jivianne Lee, MD, Dennis M. Tang,
MD and John R. Craig, MD**

Identify patients with an esophageal coin for whom esophageal bougienage is most likely to be successful; Compare and contrast the effectiveness, safety, and cost of different methods for removal of esophageal coins; Develop management strategies for patients with nasal polyps that recur after endoscopic sinus surgery; Select patients with nasal polyps who are most likely to respond to biologic therapy; Summarize recent findings on the endotypes of odontogenic sinusitis and use of tranexamic acid for postoperative epistaxis.

OT 55 - 24
