

Cellular Therapy for Solid Tumors

MARCH 12-14, 2025 | SAN DIEGO, CA & VIRTUAL

RANCHO BERNARDO INN

Join the Society for Immunotherapy of Cancer (SITC) and colleagues from around the world to explore the 2025 Spring Scientific: Cellular Therapy for Solid Tumors.

2025 Spring Scientific Topics

The two and a half-day program will include the following topics, which will be addressed by expert speakers and through abstract presentations:

- CARs
- Everything but the T Cell
- Genome Editing, Technology, In vivo Gene Editing, Base Editing, CRISPR Mouse Models
- Novel Targets for Solid Tumor Cell Therapies
- Strategies to Enhance T cell Fitness and Potency
- TCR Gene Therapy: From Private to Public Antigen Targeting
- Technologies for Correlative Studies
- The Tumor Microenvironment: Understanding and Engineering Effective Immunotherapy
- TILs

Abstracts Featuring The Latest Research

- The SITC Spring Scientific will feature abstracts with the latest, cutting-edge data on adoptive cellular therapy for solid tumors from leading experts in the field
- Abstract awards are offered for five of the top scored abstracts. You'll want to be sure to submit yours

Learning Objectives

- Describe types of cellular therapies currently being explored for the treatment of solid tumors and their mechanisms of action
- Outline methods to identify therapeutic targets and design/develop cellular therapies for solid tumors, with an emphasis on improving therapeutic efficacy
- Analyze current clinical and translational studies of engineered and non-engineered cellular therapies for solid tumors

Organizers

Christine Brown, PhD
City of Hope

Jennifer L. Guerriero, PhD
Brigham and Women's Hospital

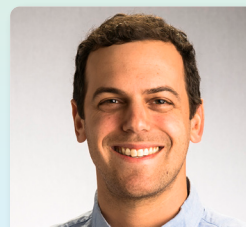

John Haanen, MD, PhD
Netherlands Cancer Institute

Christopher A. Klebanoff, MD
Memorial Sloan Kettering Cancer Center

Daniel J. Powell, Jr., PhD
University of Pennsylvania

Evan W. Weber, PhD
University of Pennsylvania

IMPORTANT DATES

Sept. 16, 2024 – Abstract Submissions Open
Dec. 20, 2024 – Early Registration Deadline

Jan. 8, 2025 – Abstract Submissions Close
Feb. 7, 2025 – Housing Deadline

HERE'S WHAT YOU NEED TO KNOW

- Present your research
 - Oral presentation and poster presentation opportunities are available
- Network with experts in the field
 - Abstract presenters have multiple networking opportunities to share their research and engage with experts in the field
- Seeking the latest, cutting-edge data on cellular therapy for solid tumors
- Encore abstracts may be submitted; submitters are encouraged to include new data

ABSTRACT SUBMISSION DEADLINE: Jan. 8, 2025
