Masters' Approach to Critical Limb Ischemia (MAC) Webcast Series

Medical Therapy for CLI

Release Date: August 9, 2016**Expiration Date:** August 9, 2017**Estimated Time of Completion:** 45 minutes

Description

[**Masters' Approach to Critical Limb Ischemia \(MAC\)**](#) is a webcast series that provides clinicians with a comprehensive review of epidemiology, pathology, diagnosis, and treatment of critical limb ischemia (CLI), peripheral artery disease (PAD), and wound care from a multidisciplinary perspective.

This series updates health care practitioners regarding the biologic basis of vascularization, assessment and classification of wounds, and current therapeutic approaches to revascularization. Through a knowledgeable approach to treating this patient population, practitioners will be able to incorporate the latest research and clinical trial findings into their practice and, thus, enhance their ability to create management strategies and improve the care of their patients.

This webcast reviews medical therapy for CLI, including guideline recommendations and novel anticoagulants. Antiplatelet regimen and treatment options for CLI will also be discussed.

Learning Objectives

Target Audience

Physicians, nurses, physician assistants, and health care professionals in vascular surgery, podiatry,

Accreditation

The Cleveland Clinic Foundation Center for Continuing Education is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

The Cleveland Clinic Foundation Center for Continuing Education designates this enduring material for a maximum of **0.75 AMA PRA Category 1 Credit™**. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Participants claiming CME credit from this activity may submit the credit hours to the American Osteopathic Association for Category 2 credit.
