Conference Description

The 1st Annual Access to Critical Cerebral Emergency Support Services (ACCESS) and Telemedicine Conference will enable participants to review best practice and discuss the benefits and challenges of providing timely access to neuro-emergent specialty care. The goals of the ACCESS program are to help reduce cost by decreasing preventable transfers and increasing staff's comfort level with neurological care management through telemedicine consultations, education and process support. Topics will include ACCESS and Telemedicine present and future, role of the telehealth coordinator, taking care of your patient using information and communication technology, managing patients with acute stroke, traumatic brain injury, acute seizures and status epilepticus in the emergency department. In addition, there will be an opportunity to network, share experiences and develop valuable partnerships that will provide support for neuro-emergent care to help serve the needs of rural communities.

Who Should Attend

The conference will be appropriate and recommended for emergency medical services, emergency medicine physicians, nurses, nurse practitioners, physician's assistants, critical care clinicians and hospitalists. This conference is intended for all members of the healthcare team who want to provide better care by overcoming disparities in access to care throughout New Mexico.

Objectives

At the conclusion of the conference, participants should be able to:

- 1) Identify telemedicine current and future applications in accessing expert neurological consultation in a rural setting.
- 2) Describe benefits and challenges of providing timely access to neuro-emergent specialty care through telemedicine consultation, education and process support.
- 3) Discuss the importance of the ACCESS and Telemedicine Programs key goal in providing better healthcare by overcoming disparities in access to care throughout New Mexico.
