Trauma Update: Tips and Tricks for Orthopedic Surgeons

November 9 – 12, 2017

Marriott Marco Island Beach
Marco Island, Florida

Musculoskeletal disorders and diseases are the leading cause of disability in the United States and account for more than one-half of all chronic conditions in people over 50 years of age.

Treatments that mitigate the long-term impact of musculoskeletal disease and return patients to full and active lives are needed. New surgical techniques and technologies are now available to assist the orthopedic surgeon in the treatment of complex fractures, particularly with traumatic injuries.

At this course, community-based orthopedic surgeons will learn how to apply new surgical techniques and technologies to assist with the treatment of complex fractures.

Quotes from Past Participants:

"Face-to-face interaction with trauma experts was the best part of the course"

"Faculty was great- best course I have been to in 20 years"

AO North America is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

This live educational activity has been approved for *AMA PRA Category 1 Credits™*.

AO North America gratefully acknowledges in-kind support for equipment and technical staff from DePuy Synthes.
