Hand-On Course
Capacity:
20-25 Students

Hands-On
+ 2 Hr Webinar
10 CEU

Modern Advanced Atraumatic and Surgical Extraction Techniques, Complications Management, Socket Grafting, GBR and Other In-Office Oral Surgery Procedures for General Dentists

Course Objectives:

The course consists of lectures and hands-on training on porcine mandibles

This course is under the direction of Thomas G. Wiedemann, MD, PhD, DDS, Clinical Associate Professor and full-time faculty at New York University, College of Dentistry, Department of Oral & Maxillofacial Surgery. Prof. Wiedemann's career consists of more than 25 years of surgical and educational experience in an academic setting and successfully operating a private practice providing the full spectrum of Oral & Maxillofacial Surgery and Implant Dentistry. He has special interests in dental emergency care, pain management, minimal invasive surgical strategies and techniques of the full scope of Oral & Maxillofacial Surgery. He has acquired extensive expertise in implant surgery with multiple implant systems since 1995. He is well versed in innovative concepts of alveolar ridge augmentation and reconstruction and soft tissue regeneration, CBCT guided and piezo-surgery. He is the author of many publications, speaker in national and international conferences on oral surgery and implantology related topics and serves on the editorial board of several renowned and peer reviewed scientific journals.

Learning Objectives:

By the end of the course doctors will be able to:

- Understand and apply practical working knowledge in non-surgical and surgical techniques used in modern exodontia
- Apply and select specific instruments for minimally invasive and alveolar ridge protecting extraction procedures to facilitate immediate dental implant placement
- Manage common real-life complications associated with tooth extractions
- Analyze and anticipate surgical challenges in tooth extractions
- Feel comfortable in risk assessment in medically compromised patients requiring tooth extractions
- Perform current simple protocols of GBR, including socket preservation, as related to pre-implantological extractions
- Perform other frequent and common oral surgery procedures in the general dental practice
- Allow participants to refine and update all surgical skills

Attendees will also receive:

30% OFF Instruments

\$1,500 OFF Mectron Piezo Touch
FREE MEMBERSHIP in the

WEBINAR

Pre-requisite to hands-on course & should be reviewed by all participants in preparation and prior to the course.

The 2 Hour webinar includes:

- Guidelines for the preoperative assessment of common medical conditions relevant for oral surgery procedures
- Provides preoperative clinical and radiographical evaluation criteria of different tooth and bone conditions prior to tooth extractions and advanced local anesthesia techniques relevant in the surgical management of acutely infected teeth
- Implications and relevance of the informed consent
