Abstract guidelines

Please use these guidelines if you are submitting an abstract directly by email (e.g. if you are a bursary applicant or an invited speaker) All other abstracts submitted using the online system should follow the guidelines given during the submission process.

- **Format & Font:** Prepare your abstract in Microsoft Word in 11-point Ariel Font.
- **Title:** The title should be concise and be in bold, sentence case.
- **Author names:** The presenting author's name must be the first name to appear on the list of authors. Underline the name of the presenting author. For each author give the forename followed by the surname
- **Affiliations:** Please list the authors and affiliations directly under the title, separated by one empty line, and followed on additional lines as necessary. Indicate each author's affiliation with a superscript numeral following the surname
- **Abstract length:** should not exceed one 1.5-spaced page. The total word limit is 400 words (to include title, authors, affiliations and abstract narrative)
- **Abstract narrative:** must be clear and concise. Clearly describe the problem you are addressing, the results to date and any conclusions you can draw from them, so that your abstract can be evaluated by the programme committee. Avoid saying in effect 'a solution to XYZ problem will be presented'. Please ensure that your abstract is checked for correctness of spelling and grammar in advance of submission.
- **References:** A separate list of references at the end of the abstract is not necessary
- **File name:** should be the same as the surname of the presenting author
- Click [HERE](#) to download a sample abstract document (in Microsoft Word).
- **Poster Boards** will accommodate 118 cm high by 84 cm wide (A0, portrait) of printed material.
- Registration must be completed in order for your abstract to be considered.
- If your abstract is accepted for a poster, your poster number will be allocated during the conference registration on arrival at Wellcome Genome Campus.
