**Customized &
Comprehensive
Aesthetic Training For
Your Specific Needs.**

About Us

MedAesthetics Training is based on years of experience in holding aesthetic training courses in both group and private settings. Our Educator Advisory Board consists of a DO, NP and PA who continually review and update training materials to ensure attendees have the most current and relevant

We provide an individualized aesthetic training approach for each attendee by meeting your needs before, during and after the training courses. Whether you need assistance with pharmaceutical account set-up, help with personalized marketing tips, customized history and consent forms, or access to inclusive supply kits, we make implementing aesthetic proce-

dures easy. In addition, our comprehensive courses contain both a didactic and clinical hands-on training that gives you the real-life experience you need to walk away confident in performing aesthetic procedures. We take each attendee's unique needs into account to provide an educational, enjoyable and successful training environment.

Why Choose Our Training

- Whether you are looking for group training or a customized in-office training our flexible training options are built to meet your specific needs.
- You deserve a customized training experience. We are available before, during and after your training to assist you where needed most: whether it's building a training package customized to your specific needs, helping with pharmaceutical account set-up or personalized marketing strategies, we work with you to make your training successful.
- The MedAesthetics Advisory Board is composed of medical professionals from a wide variety of backgrounds. Each of these educators brings different experiences as instructors, aesthetic providers and business owners. Collaborating together to form a universal teaching method has created exceptional course materials and pearls of advice for attendees.
- Attendees receive a combination of didactic and hands-on training, as well as access to informative marketing webinars and customizable patient forms to ensure you are prepared to successfully perform aesthetic procedures and capitalize on this growing market.

Industry Growth

American Society for Aesthetic Plastic Surgery reports that non-surgical procedures surpassed the 5-billion dollar mark for the first time ever in 2015.

1

Botulinum Toxin

Over 4.2 million procedures were performed in 2015, including Botox® Cosmetic, Dysport® and Xeomin.

2

Hyaluronic Acid Dermal Fillers

Over 2.1 million procedures were performed in 2015, including Juvederm Ultra & Ultra Plus, Voluma, Perlane, Restylane & Belotero.

3

Total Expenditures

Total annual expenditures for 2015: \$1.3B for Botulinum Toxin and \$1.2B for Hyaluronic Acid.

4 M

Our Courses

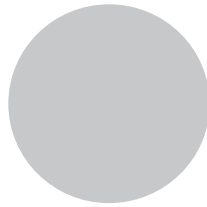

Botulinum Toxin & Dermal Fillers

The Botox®, Xeomin® and Dysport training course begins with an intensive lecture session where you will review facial anatomy and discuss the history, pharmacology, reconstitution techniques, client selection and preparation, indications, contraindications, treatment techniques, and after-treatment protocols. During the clinical hands-on training portion of the course you will perform consultations, develop treatment plans and perform injections.

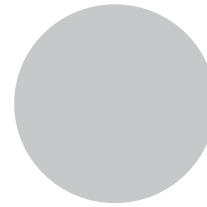

Advanced Injection Techniques

The Advanced Injection Technique course is designed for experienced medical professionals who are ready to advance their skill-set with more advanced procedures. This includes Kybella®, Botox®, Xeomin® and Dermal Fillers. This course focuses on advanced procedures in using these products together to produce successful results for your clients. This course includes both a didactic and hands-on training session.

Sclerotherapy

The Sclerotherapy course focuses on uncomplicated spider and reticular veins. The course begins with an intensive and thorough lecture session where you will learn venous anatomy, physiology, risks/complications, indications, contraindications, common sclerosants used and patient evaluation. During the clinical hands-on training portion, you will gain experience by performing client evaluations, developing treatment plans and performing Asclera® injections.

Facial Analysis Microdermabrasion/ Chemical Peels

During the Facial Analysis/ Microdermabrasion/Chemical Peels training course you will analyze the condition of skin and developing a course of action. Combining facials with microdermabrasion and chemical peels are profitable add-ons to offer your clients. You will learn the theory behind microdermabrasion and chemical peels, techniques, types of equipment, types of chemical peels, technical applications, treatment protocols, contraindications and pre/post treatment procedures. This course includes both a didactic and hands-on training.

Attendees

MedAesthetics Training offers comprehensive aesthetic training courses for medical professionals. Our injectable courses are open to Physicians, Physician Assistants, Nurse Practitioner and Registered Nurses. Courses are held at locations throughout the United States, and customized in-office trainings are also available.

Are you wondering if aesthetics is right for you? At MedAesthetics Training, we train medical professionals of varied backgrounds who have an interest in learning non-invasive aesthetic procedures.

Many of our attendees would like to add aesthetics into an existing practice, or are opening up a new aesthetic office.

We also train medical professionals who are looking for a career change, or who are recent medical graduates. Our courses are designed so that attendees from all backgrounds walk away feeling comfortable performing aesthetic procedures. We do this by keeping the courses small (no more than 8 attendees), having both a didactic and clinical hands-on training session, staffing experienced instructors who perform aesthetic procedures on a regular basis, and an office staff who is available to answer your questions before, during and after the training course.

Models

At MedAesthetics Training we offer discounted aesthetic procedures at a fraction of the cost. During our training courses only genuine, FDA Approved products are used, and you pay only for the cost of the product. All injectable procedures are performed by medical professionals and are closely monitored by our experienced instructors.

When you register as a model for one of our training courses, you can expect to make well informed choices regarding your procedures. You will receive a detailed guide to care that will explain each procedure in detail as well as Pre & Post instructions so that you get the most out of your procedures. Models are an integral part of the MedAesthetics training philosophy. It is important that you feel comfortable choosing us for your aesthetic needs, and we will be happy to answer any questions you may have about the modeling experience.
