NEEDS ASSESSMENT

We have surveyed our conference participants and professionals in the community through an annual needs assessment and on-site evaluations at our conferences, and have found an increase in educational need for cutting edge information on topics including osteoporosis, physical exam to diagnose and medically manage certain orthopaedic conditions, functional knowledge of anatomy, choosing correct casting/splinting for specific injuries, proper referrals, joint tap injections, x-ray interpretations, pediatric orthopaedic exam, diagnosis, and treatment. There is an evident need for this information on selection of treatments for orthopaedic injuries.

This year's conference will specifically address all of these unmet educational needs and provide practitioners with state-of-the-art tools to better treat their patients. This unique seminar provides a comprehensive review and update of orthopaedic problems and their complications. Emphasizing an anatomical approach, seminar leaders begin with the fingers and proceed through the upper limb, down the spine, along the leg to the toes. This approach gives general, family, and emergency physicians, pediatricians, internists, and FNP/PA's a comprehensive view of orthopaedics that is applicable to their daily practice and is clinically relevant. Emergency physicians can expect to use the information to care for the patient with an acute orthopaedic injury. The program includes lectures, small group discussions, clinical workshops, and an electronic syllabus. In anatomical review workshops, participants work with cadaver specimens. Another workshop provides practical experience in the application of casts and splinting techniques. The camp experience allows participants to interact with faculty outside the classroom.

EDUCATIONAL OBJECTIVES

At the conclusion of this program, participants should be able to:

1. Better evaluate common fractures and dislocations
2. Interpret x-rays
3. Screen and evaluate pediatric and adolescent hip and knee problems
4. Identify the principles of healing
5. Cast orthopaedic injuries
6. Describe clinically relevant gross anatomy
7. Better evaluate and treat sprains, strains and soft tissue problems in the muscular skeletal system
8. Diagnose and treat osteoporosis

LOCATION

STANFORD SIERRA CAMP

Fallen Leaf Lake, CA 96150

(530) 541-1244

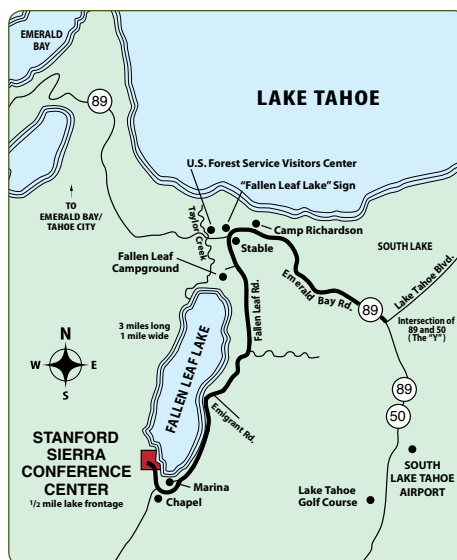

<http://www.stanfordsierra.com>

The 37th annual conference convenes at Stanford Sierra Camp (SSC) on the edge of beautiful Fallen Leaf Lake, just south of Lake Tahoe.

The experience begins as you wind your way down Fallen Leaf Road past beautiful pine and aspen filled woods and meadows into a small, mountain lake community. Located at an elevation of 6,300 feet at the entrance to Desolation Wilderness, SSC

offers a spectacular setting of natural beauty. Comfortable lake-view cabins, family style dining, and outdoor mountain activities are the heart of the Stanford Sierra Camp experience. The Camp atmosphere promotes the additional benefits of the conference:

• High quality faculty • Exciting dialogue with colleagues
• Networking • Relaxing with family and friends, new and old

ALL INCLUSIVE CAMP PACKAGE

This program is designed for all attendees and their guests to stay on-site

(offsite lodging is not permitted). DISCLOSURE OF RELEVANT FINANCIAL RELATIONSHIPS

As a provider accredited by the Accreditation Council for Continuing Medical Education, the University of California, Davis Health System Office of Continuing Medical Education must ensure balance, independence, and objectivity in all CME activities to promote improvements in health care and not proprietary interests of a commercial interest. The provider controls all decisions related to identification of CME needs, determination of educational objectives, selection and presentation of content, selection of all persons and organizations that will be in a position to control the content, selection of educational methods, and evaluation of the activity. Course directors, planning committee members, presenters, authors, moderators, panel members, and others in a position to control the content of this activity are required to disclose relevant financial relationships with commercial interests related to the subject matter of this educational activity. Learners are able to assess the potential for commercial bias in information when complete disclosure, resolution of conflicts of interest, and acknowledgment of commercial support are provided prior to the activity. Informed learners are the final safeguards in assuring that a CME activity is independent from commercial support. We believe this mechanism contributes to the transparency and accountability of CME.

This program is self-supporting and receives no state funding.
