

Duke Masters of Minimally Invasive Thoracic Surgery September 19-21, 2013

Thursday, September 19, 2013

7:00 pm Welcome Reception and Registration

Friday

September 20, 2013

7:00 Breakfast

7:20 Introduction and Announcements

I Thoracoscopic Lobectomy

Moderator

7:30 Thoracoscopic Lobectomy: The State of the Art

8:00 Mastering Thoracoscopic Upper Lobectomy

8:30 Prevention and Management of Intraoperative Complications

9:00 Robotic Thoracoscopic Lobectomy

9:30 Discussion

9:45 Break

II Thoracoscopic Resections: Advanced Disease

Moderator

10:00 Thoracoscopic Sleeve Lobectomy and Pneumonectomy

10:30 Thoracoscopic Lobectomy for Locally Advanced Lung Cancer

11:00 Thoracoscopic Vascular Control

11:30 Discussion

12:00 Lunch

III Lymph Node Staging

Moderator

1:00 EBUS, EUS, Navigational Bronchoscopy

1:20 VAMLA

1:40 Thoracoscopic Mediastinal Lymph Node Dissection

IV Unusual Case Presentations

Moderator

2:00	Case #1 and #2
2:20	Case #3 and #4
2:40	Case #5 and #6

**Saturday, September
21, 2013**

7:00	Breakfast
7:20	Introduction and Announcements

V Minimally Invasive Esophageal Surgery

Moderator

7:30	Minimally Invasive Esophagectomy
8:00	Robotic Esophagectomy
8:30	Barrett's Esophagus: Minimally Invasive Options
9:00	Minimally Invasive Repair of Paraesophageal Hernia
9:30	Discussion

9:45	Break
------	-------

VI Minimally Invasive Thoracic Surgery: Miscellaneous

Moderator

10:00	Mastering the Anastomosis in the MIE: Cervical and Thoracic
10:30	VATS for Mediastinal Masses
11:00	Robotic Thymectomy
11:30	Credentialling in Robotics

12:00	Lunch
-------	-------

VII Controversies in the Management of Stage I NSCLC

Moderator

1:00	CT Screening and Managing Subcentimeter Nodules
1:20	Role of Thoracoscopic Segmentectomy
1:40	SBRT and RFA

VIII Debate: Do the Advantages of Robotics Justify the Cost?

Moderator

2:00	Pro
2:20	Con

2:40 Discussion

3:00 Adjourn

Opportunities for Q&A will be provided at the conclusion of each presentation
