

General Information

Target Audience

General surgeons, gastroenterologists, internal medicine physicians, family medicine physicians, physician assistants, nurse practitioners, nurses and residents.

Educational Objectives

At the conclusion of the program, the participant should be able to:

- Describe the latest techniques in general, colorectal, oncologic and bariatric surgery and how they can be used to improve patient care.
- Discuss the newest approaches to the management of hepatitis C, inflammatory bowel disease, Barrett's esophagus and small bowel disorders.
- Identify the therapeutic implications for microRNAs.
- Describe likely changes in the academic health care environment.

Register

To register online using a credit card, visit www.umassmed.edu/cme/events. Directions and parking information available online.

Registration Fees

Physicians and Nurses: \$125
