SCHOOL OF MEDICINE

Liver Cancer Update

Saturday

June 15, 2013

Eric P. Newman Education Center
Washington University Medical Center

Course Chair
Jeffrey S. Crippin, MD

Presented By
The Multidisciplinary Liver Cancer Team
Washington University School of Medicine

Sponsored By
Washington University School of Medicine
Continuing Medical Education

LEARNING & PERFORMANCE OBJECTIVES

There is often a misunderstanding regarding the management of primary liver malignancy with many clinicians viewing this as a terminal diagnosis. However, the standard of care is dependent on specific patient characteristics. All of the following, either alone or together, may be considered appropriate: surgical resection, liver transplantation, chemoembolization, chemotherapy, and radiation therapy. In order to help close this gap in knowledge and performance, this course is designed for physicians and allied health professionals in internal medicine, family practice, oncology, gastroenterology, general surgery and hepatobiliary surgery. The intended result of this live activity is increased knowledge, competence, and performance in the delivery of optimal care for patients with primary liver malignancies. At the conclusion of this activity, participants should be able to:

- Discuss the indications for and outcomes from different treatments for primary liver malignancies.
- Discuss the diagnosis of and risk factors for primary liver malignancies.

WASHINGTON UNIVERSITY SCHOOL OF MEDICINE ACTIVITY FACULTY

William C. Chapman, MD, Professor of Surgery

Eugene Bricker Chair of Surgery; Chief, Division of General Surgery

Chief, Section of Transplantation Surgery

Jeffrey Crippin, MD

Marilyn Bornefeld Chair in Gastrointestinal Research and Treatment

Professor of Medicine, Division of Gastroenterology
