Overview:

This conference is designed to efficiently discuss the most recent clinical advances in oncology. It will address the questions that have emerged from the latest data presented at major international annual meetings.

Objectives:

At the completion of this conference, participants should be able to:

- » Evaluate the role of new diagnostic techniques and therapeutic approaches as applied to the care and management of cancer patients
- » Discern new data from key studies in clinical cancer research
- » Explain clinical strategies designed to improve the quality of cancer care
- » Identify tools for cancer risk assessment based on the best evidence
- » Evaluate and recommend multidisciplinary treatment plans for cancer patients
