Meeting**

Hospitalists and inpatient clinicians are increasingly called upon to provide care for patients of high acuity across a broad spectrum of medical and surgical conditions. In the face of these demands, hospitalists strive to become **Master Clinicians** – to be able to diagnose and manage complex diseases, incorporate high-quality evidence, and provide patient-centered care. However, given the pace of the expansion of clinical evidence and evolving guidelines, it is challenging for busy clinicians to remain current on the most effective practices. This symposium will provide the essential updates that clinicians will need to be confident they are providing outstanding evidence-based care.

Our faculty consists of national and international leaders in their fields and our sessions have been designed to provide highly relevant material in a concise and stimulating format. The symposium's rapid pace, relevant topics, and variety of workshops will ensure a highly valuable experience.

HIGHLIGHTS INCLUDE:

- Keynote speaker, Dr. Joe Li, Chief of the Division of Hospital Medicine at Beth Israel-Deaconess, Boston, who will discuss **The Future of Hospital Medicine**
- Plenary lecture by ACP leader Dr. Deborah Korenstein on **Choosing Wisely** focusing on wasteful practices to avoid and hospitalists as stewards of limited resources
- **Pearls for Practice** series presenting rapid fire lectures on core topics
- Update in Hospital Medicine session
- Expanded **Update Series** – now includes sessions in Cardiology by Dr. Jon Halperin, Chair-Elect of the ACC/AHA Task Force on Practice Guidelines, and an Update in Nephrology

3 WORKSHOP TRACKS!

- **Hospitalist Generalist**
- ❖ **Hospitalist Specialist**
- ◆ **Enhancing Quality & Value**

Our highly rated **WORKSHOPS** provide participants with a choice of **Three Tracks** in which to gain expertise. Concentrate in one of these tracks to develop expertise or mix-and-match tracks to experience a greater variety of topics:

- (1) **HOSPITALIST AS GENERALIST**—Enhance skills in core topics such as Symptom Management at the End of Life and Peri-Operative Management
- (2) **HOSPITALIST AS SPECIALIST**—Develop expertise in Pulmonary Hypertension, HIV, and IBD
- (3) **ENHANCING QUALITY & VALUE**—Become proficient in Co-Management, develop expertise in ICD-10 implementation, or learn skills for Small Group Teaching

Come to increase your knowledge of core topics, learn more of subspecialty conditions, enhance your QI skills, increase your value to your hospital, and network with colleagues. In short, come to continue your quest to become a **Master Clinician!**

PROGRAM OBJECTIVES

At the conclusion of this CME activity, the participant should be able to:

- Identify patients who will benefit from non-invasive ventilation
- Apply recent evidence and guidelines on the management of patients with cardiac conditions, including atrial fibrillation and acute coronary syndrome
- Prescribe appropriate antibiotics for patients with *C. difficile* colitis based on the severity of illness
- List practices and treatments that are wasteful, costly, and should be avoided
- Apply the key features of a successful co-management program to their home institution
- Assess the implications of physician value-based purchasing and the upcoming ICD-10 coding system on their hospitalist practice
- Apply principles of small group teaching to their own teaching practice
- Identify appropriate indications for blood transfusion, including “triggers” for various scenarios and conditions
