

Epilepsy Medicine and EEG: A Comprehensive Review

October 4-6, 2013

The Westin Beach Resort | Fort Lauderdale, Florida

Advances in the understanding and treatment of epilepsy have potential to improve the lives of many patients with epilepsy. The ***Epilepsy Medicine and EEG: A Comprehensive Review*** is designed to bring up-to-date information and standard of care practice to all neurologists with an interest in the diagnosis and treatment of epilepsy. Two full days of the course are devoted to a comprehensive range of topics covering epilepsy syndromes and seizure types in children and adults, medical treatment, co-morbidities, and assessment for epilepsy surgery. The last half day reviews interpretation of electroencephalography.

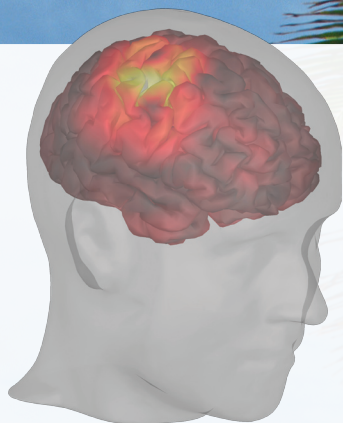

Key Topics

- Seizures in infancy and childhood
- Differential diagnosis of epilepsy
- Pharmacokinetics of antiepileptic drugs
- Uses and adverse effects of antiepileptic drugs
- Treatment considerations in women of childbearing age
- Identify candidates for epilepsy surgery
- Normal and abnormal EEGs in neonates and children
- Accurate assessment of interictal and ictal EEG abnormalities

This activity has been approved for *AMA PRA Category 1 Credit™*

The American Board of Psychiatry and Neurology has reviewed the Epilepsy Medicine and EEG: A Comprehensive Review and has approved this program as part of a comprehensive Self Assessment Activity program, which is mandated by the ABMS as a necessary component of maintenance of certification. 19.75 Category 1 CME credits from the education activity and 8 Self Assessment CME credits.
