PROGRAM DESCRIPTION & OBJECTIVES

Update in Gastroenterology, Hepatology and Nutrition is a two-day review course that focuses on important recent developments and current controversies in gastrointestinal and liver disease, gastrointestinal cancers, and abdominal organ transplantation. The format will consist of succinct presentations and extensive discussion with audience participation. During the luncheon session, participants will have an opportunity for in-depth discussions with faculty on specific topics of their choosing.

The program is targeted toward a nationwide audience of gastroenterologists, internists, medical oncologists, nutritionists and surgeons. Topics to be covered will include, among others, challenges in GI disease related to anatomical structure and function; approaches to the diagnosis and treatment of IBS and IBD; an update in treating gastrointestinal malignancies; advances in hepatobiliary endoscopy, and the latest state-of-the-art developments in liver transplantation.

At the conclusion of the program, participants will be better able to:

- Describe new technologies in the treatment of Inflammatory Bowel Disease, including treating Crohn's disease and ulcerative colitis, surgical treatments for IBD, and answering the safety concerns of treating IBD in the pregnant patient.
- Discuss the role of new therapies for hepatitis B, hepatitis C, and hepatocellular carcinoma.
- Describe new developments in the treatment of C. difficile colitis.
- Recognize the utility of pharmacologic and endoscopic therapies for reflux disease and Barrett's esophagus.
- Describe recent developments in bowel preparation and best practices regarding colonoscopy.
