Yamazaki**

**Yudai
Ogawa**

**Masayuki
Okawa**

**Koichi
Inuki**

Experience the latest developments in aesthetics, tissue augmentation, and implantology by the most advanced dental schools.

ABOUT CONGRESS

TOKYO IN AUTUMN'S GLOW,
OHI-S IS READY TO SHOW!

OHI-S Congress in Tokyo during momiji. The world's leading advanced schools of white and pink aesthetic. In the vibrant capital of Japan, where history and modernity intertwine, autumn paints the city in golden and crimson hues, transforming it into a living masterpiece.

During this season, temple gardens, ginkgo-lined avenues, and urban parks create a magical landscape, making autumn in Tokyo an unforgettable spectacle for everyone to experience.

This congress is more than just lectures by legends of aesthetic and implant dentistry from Japan, the United States, and Germany—it offers international networking, inspiring discussions, and the unique atmosphere of Tokyo at its most beautiful season.

Dentists from around the world gather to share knowledge, exchange ideas, and experience the best of Japanese dentistry.

**Masana
Suzuki**

Practicing periodontist in Tokyo with a full-time private practice since 1989. Internationally recognized expert in periodontal microsurgery using a microscope. Active member of several professional organizations, including the Japanese Society of Periodontology, AMED, and advisor for SJCD Tokyo.

Masana Suzuki

Lecture 1 | ⌚ 1 h 30 min

The topic will be confirmed

- the program will be detailed

Yudai Ogawa

Lecture 2 | ⌚ 1 h 30 min

Management of Hard and Soft Tissues Around Natural Teeth and Implants

- Save the Tooth:
 - Periodontal regeneration protocols,
 - Management of open gingival embrasures;
- Save the Tissue:
 - Immediate implant placement: indications, protocols, and soft-tissue preservation;
- Save the Implant:
 - Hard and soft tissue management around planned implant sites,
 - Management of peri-implant tissues around existing implants.

Frank Schwarz

Lecture 3 | ⌚ 3 hours

Surgical Management of Peri-implantitis

- Modified flap designs and advanced suturing techniques;
- Implant surface decontamination methods;
- Reconstructive and modified reconstructive approaches for Class I and Class III defects;
- Resective approaches for Class II defects;
- Combined surgical protocols for advanced Class III defects;
- Soft tissue volume grafting to prevent postoperative recession;
- Criteria and techniques for implant removal and site redevelopment.

Masayuki Okawa

Lecture 4 | ⌚ 3 hours

The Concept of Veneer Tooth Preparation Design in the Digital Era

- Evolution of veneer restorative treatment;
- Shift from crowns to minimally invasive veneers;
- Impact of digital technology on veneer dentistry;
- Advantages of digital dentistry in tooth preparation;
- Principles of contemporary veneer preparation design:
 - Minimally invasive preparation,
 - Finish line design in the digital era;
- How digital tools reshape step-by-step veneer preparation;
- Quality control checkpoints using digital visualization;
- Recommendations for clinical implementation.

Koichi Inuki

Lecture 5 | ⌚ 1 h 30 min

Contemporary Concepts in Prosthetic Restorative Treatment

- Protocols of tooth preparation that ensure the success of prosthetic restorations;
- The importance of provisional restorations;
- Collaboration with dental technicians;
- Adhesive protocols for successful prosthetic restorative treatment;
- Utilization of the dental microscope in everyday practice.

Edward McLaren

Lecture 6 | ⌚ 3 hours

Contemporary Ceramics and the Digital Dental Team

- the program will be detailed

Masao Yamazaki

Lecture 7 | ⌚ 1 h 30 min

Interdisciplinary Management of Complex Restorative Treatment

- the program will be detailed
