

NYU | DENTISTRY

Comprehensive Oral and Maxillofacial Surgery Update Course

NOW IN ITS 11TH SUCCESSFUL YEAR!

**Tuesday, July 21 – Friday, July 24, 2015
NEW YORK, NEW YORK**

Continuing medical education provider

Continuing dental education program sponsored by
NYU College of Dentistry

Overview

This comprehensive three and a half day course has been designed to provide an update of the full scope of the specialty of oral and maxillofacial surgery by recognized leaders in their respective fields. Content will include recent advances and new approaches to patient evaluation and treatment. The information presented will be current, evidence-based and clinically relevant and supported by case discussions and simulations to illustrate the salient points of the didactic presentations.

Target Audience

This course is intended for the practicing oral and maxillofacial surgeon or the current oral and maxillofacial surgery resident seeking to enhance their knowledge of the specialty.

Professional Practice Gaps

Surgeons may not be incorporating best practices or state of the art technologies in providing care to their patients undergoing craniomaxillofacial or dental surgery. Algorithms may be missing innovative changes in the timing and sequencing of interventions, choices in new biomaterials, and strategies in the prevention and management of complications. Addressing this gap in practice can improve patient facial repair outcomes, including decreasing pain and treatment time.

Assessment of Need

New York University College of Dentistry's Comprehensive Oral and Maxillofacial Surgery Update Course provides an opportunity to gain the knowledge of recent advances in patient evaluations and treatment necessary to provide quality care to patients requiring oral and maxillofacial surgery. Surgeons need to understand the strengths and weaknesses of current and innovative treatment options; patient evaluation, timing and sequencing of surgical interventions; reconstruction, fixation, distraction, and biomaterials choices; prevention and management of the patient preoperatively, and postoperative complications; and new technologies

Methodology-Format

This educational activity is highly interactive and allows participants to engage in thoughtful discussion. Case presentations and interaction with faculty to gain a perspective of the advancements in oral and maxillofacial surgery is one of the highlights of the course. Podcasts and an electronic syllabus provides information for further review and reference.

Course Objectives

Upon completion of this course, the attendee should be able to:

1. Discuss the impact of systemic diseases in the field of maxillofacial surgery and apply to evaluation and patient management strategies.
2. Develop criteria for the use and administration of ambulatory sedation and general anesthesia in order to establish best practices.
3. Explain differential diagnosis and a treatment plan for odontogenic and non-odontogenic pathologic conditions of the maxillofacial region.
4. Select treatment options for maxillofacial reconstruction based on patient evaluation.
5. Develop a comprehensive evaluation of a trauma patient and identify approaches for treatment and options for managing post-operative pain.
6. Discuss methods for evaluating and treating patients with dentofacial deformities and head and neck infections to improve outcomes.
7. Identify the etiology and microbiology of infections of the maxillofacial region and treatment strategies.
8. Identify the etiology, patterns and frequency of cleft lip and palate deformities and the treatment based on criteria discussed.
9. Discuss the assessment of dentoalveolar surgical treatments and apply methods of preventing complications and patient management to improve outcomes.
10. Evaluate and develop criteria for facial esthetics and apply various surgical approaches.
11. Discuss algorithms for temporomandibular disorders and the treatment based on comprehensive examination and clinical findings.
12. Describe a strategy to evaluate patients requiring pre-prosthetic surgery and implants based on indications and contraindications of placement of dental implants.

Accreditation Statement-Dentistry

New York University College of Dentistry Linhart Continuing Dental Education Program is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry.

ADA Credit Designation

NYU CDE designates this activity for **35 continuing education credits**.

Accreditation- Physician

Pfiedler Enterprises is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

Credit Designation

Pfiedler Enterprises designates this educational activity for a maximum of **35 AMA PRA Category 1 Credit(s)™**. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Topic	Presenter
Surgical Pathology and Reconstruction	Joan A. Phelan, DDS Professor and Chair Department of Oral and Maxillofacial Pathology, Radiology, and Medicine NYU College of Dentistry • New York, New York
	Brian Schmidt, DDS, MD, PhD Director Bluestone Center for Clinical Research Professor Oral and Maxillofacial Surgery NYU College of Dentistry • New York, New York
	King Chong Chan, DMD, MS, FRCD(C) Director of Oral and Maxillofacial Radiology Department of Oral and Maxillofacial Pathology, Radiology and Medicine NYU College of Dentistry • New York, New York
MRONJ/Necrotic Bone Disease	Kenneth E. Fleisher, DDS Clinical Associate Professor Department of Oral and Maxillofacial Surgery NYU College of Dentistry • New York, New York
