CSI FOUNDATION EVENTS

We are dedicated to the development of congenital, structural and valvar heart interventions worldwide. Our members receive discounted entry to CSI events. Join us at www.csi-foundation.org

CSI-UCSF 2017

SEPTEMBER 8–9, 2017 | SAN FRANCISCO, USA

On behalf of the Organizing Committee we are pleased to invite you to CSI-UCSF: Catheter Interventions in Structural, Valvular and Congenital Heart Disease, Arrhythmias and Heart Failure.

The CSI Foundation and the University of California, San Francisco (UCSF) are collaborating to create a meeting that will give attendees a comprehensive overview of major topics in catheter and device therapy for structural and valvular heart disease, in addition to novel therapies for atrial fibrillation and heart failure. There will also be sessions on catheter therapy for congenital heart disease in adults. The program will include lectures from leading experts in the field, case presentations with panel discussions, live/recorded cases, a review of ongoing and future studies and training sessions.

WHO SHOULD ATTEND CSI 2017

The meeting is designed for adult and pediatric interventional cardiologists, cardiothoracic surgeons, anesthesiologists, EP specialists, imaging specialists, nurses, technicians and any other medical specialty involved in these procedures.

TOPICS

- TAVR, TMVR and TPVR
- Transcatheter mitral and tricuspid valve repair
- New devices for heart failure treatment
- Interventional EP/surgery for arrhythmias
- Catheter interventions for pulmonary hypertension
- ASD and VSD closure
- Catheter closure of paravalvular leaks
- PFO closure
- LAA closure for stroke prevention
- Imaging for structural, congenital and valvular heart disease interventions
- New and upcoming technologies in structural interventions

WHAT WILL MAKE THIS MEETING UNIQUE?

The concept is all about interaction between faculty and attendees. Participants are actively encouraged to submit cases for presentation, ask questions, share their ideas and experiences. CSI-UCSF will be an opportunity for you to learn the latest techniques, see the newest devices and meet the most experienced interventionists in the field.
