CSIM Mission Statement

The CSIM is a non-profit professional society that promotes the health and well-being of Canadian patients, their communities, and their health care systems. We seek to foster leadership and excellence in the practice of General Internal Medicine (GIM) through research, education, and advocacy for health promotion and disease management.

Vision

We believe that General Internal Medicine in Canada plays a central role in the training of current and future clinicians, in clinical research, in patient care, in health promotion, and in health advocacy; and that it unites a body of knowledge, values, and principles of care that lay the foundation for excellence in the Canadian health care system.

Values

We embrace the ethical and professional standards that are common to all healing professions, as well as the specific values of generalism, teamwork, competency-based training, life-long learning, evidence-based medicine, holism, and humane, patient-centered care.

CSIM CPD Subcommittee Vision

Our ultimate goal is to go beyond the simple transmission of information. Our goal is to make a lasting impact on the knowledge, skills and attitudes of clinicians and future clinicians; to narrow the theory to practice gap; to improve the health of all Canadians.

Program subject to change.

GENERAL LEARNING OBJECTIVES

- Maintain competence on a variety of relevant topics in Internal Medicine and General Internal Medicine.
- Discuss new topics (both published and un-published) that have arisen since the last CSIM meeting.
- Promote General Internal Medicine as a specialty to our residents in training.
