DESCRIPTION This intensive two-day educational course will offer advanced lectures that will familiarize participants with the management of the patient with head and neck cancer. The course will be given by world-recognized MD Anderson Cancer Center faculty and staff. Contemporary methods of surgical and non-surgical treatment modalities including surgery, reconstruction, radiation and chemotherapy, will focus on the functional impact to speech and swallowing in patients with head and neck cancer. Panel discussions will highlight treatment alternatives and controversies. A second day of special topics in speech and swallowing outcomes will help participants integrate and apply key information to successfully evaluate and treat patients with head and neck cancer.	8:45	Surgical Management: The Oral Cavity/ Oropharynx Neil D.
