

ALSG's medical education & training programmes improve outcomes for people in life-threatening situations, anywhere along the health care pathway, anywhere in the world.

Team Provider HMIMMS

Major Incident, Medical Management and Support: The practical approach in the hospital setting education programme

Hospital MIMMS (HMIMMS) is the leading course for hospital staff responsible for planning, training and managing aspects of a major incident from a hospital perspective, with course objectives including:

- The type and incidence of major incidents and therefore the need for proper response and management planning.
- Understand and able to implement and follow the seven principles encapsulated in the CSCATTT approach to successfully managing a major incident.
- Understand the need for major incident training—focusing on those aspects of the plan which do not occur in day-to-day practice, i.e., command, control, communication and triage.
- Able to deliver the medical support needed for major incidents in the hospital setting using the concept of 'collapsible hierarchy'

Team provider HMIMMS curriculum and key information

A 1-day face-to-face course with lectures, workshops and table top exercises. The course is open to anyone within the hospital, who is involved in managing a major incident. The course is run throughout the UK and overseas, and the cost varies across course centres.

Lectures

- Welcome and introduction—incidents in context
- Major incidents phases and hierarchies

Workshops

- Triage
- Communication
- Definitive care
- Recovery
- Local orientation session

Table top exercises

- Reception phase

Candidate criteria and eligibility

This HMIMMS education programme is aimed at staff who will form part of the major incident team within their hospital.

Assessment and certification

The HMIMMS certification is valid for four years.

Recertification options

All recertifying candidates must undertake the course again after four years.

*"What we want to see is increased consistency and quality in education and training and consequently in people's outcomes and experiences...Service delivery and education and training are fundamentally interlinked."*²

ALSG's medical education & training programmes improve outcomes for people in life-threatening situations, anywhere along the health care pathway, anywhere in the world.

"Training, exercising and testing of significant incident and emergency plans within individual NHS organisations, between NHS funded organisation and with multi-agency partners is an important part of emergency preparedness..."¹

Important course updates and references

There are currently no updates or references for the Team Provider HMIMMS course.

Continuous Professional Development

Revised guidance from the Academy of Medical Royal Colleges emphasises that the focus of CPD should be on its quality and reflection of its impact on a clinician's practice, rather than the amount of time spent on the activity and that the responsibility for identifying CPD requirements rests with the individual and should be based on their personal areas of practice and personal development plan agreed at their annual appraisal. Although one 'CPD credit' will normally equate to one hour of educational activity, the amount of educational activity obtained from a specific event may vary Between individuals depending on an individual's specific learning outcomes.

Information for educators and managers

As a charity, ALSG invests all profits in educational resources and partners with the most effective and respected organisations worldwide to develop exceptionally high quality programmes.

ALSG education quality is verified, accredited and recognised internationally as 'best in class', contributing to better outcomes for patients in life-threatening situations.
