A Practical Guide to Effective Non Medical Prescribing for Pain

For Current and Aspiring Non Medical Prescribers

Monday 18 March 2019 De Vere West One Conference Centre, London

Almost 10 million Britons suffer pain almost daily"

The British Pain Society

"Chronic pain affects between one-third and one-half of the population of the UK, corresponding to just under 28 million adults" BMJ

This important national conference provides an essential update for current and aspiring non medical prescribers on prescribing for pain. Pain is a growing area of nurse prescribing and one of the most common areas, in a survey of the Association for Prescribers members 50% of members prescribed for pain (Karen Stenner, University of Surrey). This makes it essential that nurse prescribers maintain the competence and skills to prescribe for pain in an effective way, working with patients to improve pain outcomes.

The conference will also discuss the role of the Prescribing Competency Framework in supporting non medical pain prescribing standard. Through national updates and extended interactive practical case studies delegates will hear how to develop and maintain prescribing competence, and how to develop effectiveness in post qualification practice. Extended sessions developing prescribing competence and confidence, medication management, managing medication safety and preventing medication errors and overcoming the barriers to effective pain management.

This conference will enable you to:

- Network with colleagues who are working to improving non medical prescribing for pain
- Learn from outstanding practice in management of pain
- Develop your skills in pain assessment
- Learn how to use the National Prescribing Competency Framework
- Understand how to effectively develop, demonstrate and maintain continued competence in Prescribing for Pain
- Reflect on lessons from experts in non medical prescribing for specific case study areas with in depth interactive sessions focusing on Pain Assessment, Chronic Pain, Inpatient Pain, Pain in the Older Person, Cancer and End of Life Care Pain including Symptom Control
- Working with patients with co-morbidity
- Identify key strategies for improving non medical prescribing practice for pain
- Develop your role and confidence as a non medical prescriber
- Self assess, reflect and expand your skills in prescribing practice whilst understanding your limits of practice

100% of delegates at our previous conference on this subject would recommend it to a colleagues

Comments included

-exceptional. Thank you very much"

10.00 Chair's Welcome and Introduction: Nurse prescribing for pain – Update – Where are we now?

Sharon Kitcatt

Deputy Module Leader for Non-Medical Prescribing
Kings College London

10.20 EXTENDED SESSION: Prescribing for Pain and the National Prescribing Competency Framework
