LAS VEGAS 23rd ANNUAL SCIENTIFIC PROGRAM

WYNN Resort & Casino - Las Vegas - September 28-30, 2017 up to 25 CECH (10 Radiology Credits: △)

GOALS & OBJECTIVES:

The attending practitioner should be able to have a better understanding of multiple topics and subjects discussed during the 25 hours of continuing medical education classes with improvement in current knowledge and applications of treatment techniques for conditions involving the lower extremities.

- **To better understand current treatment options for the management of infant ingrown toenails and micro versus macro neurolysis and the comparison of current treatments.**
- **To improve the recognition of interesting dermatology clinical cases and complicated cutaneous acral lentiginous melanoma and to review the current recommendations for treatments of these conditions.**
- **To review current trends and treatment protocols for conditions such as anterior cavus foot and related difficult postural foot conditions.**
- **To learn specific techniques for recognition, evaluation and management, including current medical and surgical treatment of tendon and ligament injuries.**
- **To provide additional understanding of first ray anatomy and the options for the treatment of deviated 1st metatarsal problems.**
- **To better understand current treatment options and recommendation for talar dome lesions.**
- **To review current thoughts on treating foot and ankle conditions in the pediatric patient.**
- **To learn updated information regarding biomechanical evaluations of the foot and total contact orthotic devices and the conditions that are treated with this modality.**
- **To review and better understand the concepts of limb salvage and vascular & intervention therapies in wound care.**
- **To compare the advantages of a TMA versus isolated ray resection and better understand whether fixation matters in the rheumatoid foot patient.**
- **To explore diverse topics presented by medical professionals in specialized areas of podiatric medicine and surgery, dermatology and diagnostic imaging.**
