LEARNING OBJECTIVES

At the conclusion of this live conference, participants should be better able to:

- Discuss the use of currently recommended diagnostic and treatment approaches for specific dermatologic conditions and match patients with the most appropriate interventions.
- Apply evidence-based pharmacologic and nonpharmacologic strategies to the management of patients with acne.
- Review current scientific findings that demonstrate the underlying pathophysiology of, and the treatment targets for, acne vulgaris.
- Discuss the factors that increase a patient's risk for developing actinic keratosis.
- Design a treatment strategy for actinic keratosis that improves outcomes while minimizing the potential risk of complications.
- Discuss the benefits and risks of current agents and techniques commonly used in aesthetic and procedural dermatology.
- Select filler agents suitable for use in treating different facial areas.
- Design a nonsurgical treatment strategy, including potential use of neuromodulators, to address patient concerns about facial aging.
- Develop a treatment approach for atopic dermatitis that achieves the goal of clear or almost clear skin.
- Review safety and efficacy data on therapies that target the inflammatory component of atopic dermatitis.
- Compare and contrast the symptomatology of atopic dermatitis and the differences in the approach to treatment for adults vs pediatric patients.
- Recognize the role of dermoscopy in diagnosis and management of various skin lesions.
- List signs, symptoms, and diagnostic indicators of hidradenitis suppurativa severity levels and describe initial steps for treatment.
- Identify the conditions under which patients with hidradenitis suppurativa would be eligible for treatment with biologic therapies.
- Describe recent scientific findings that explicate the inflammatory basis of psoriasis.
- Discuss current clinical guidelines for optimal diagnosis and treatment of psoriasis.
- Review safety and efficacy data on new and emerging therapies for psoriasis.
- Implement a strategy for stepwise management of psoriasis with topical and biologic agents, including the use of treat-to-target goals
- Apply current strategies for assessing and treating dermatologic conditions in pediatric patients, including acne, infections, birthmarks, hair disorders, and skin tumors.
- Identify when epicutaneous patch testing is appropriate in pediatric patients.
- Discuss safety and efficacy data on current and emerging therapies for rosacea.
- Define appropriate goals and strategies for the optimal management of patients with rosacea.
- Distinguish between benign nevi and suspicious neoplasms.
- Discuss available treatment strategies for melanoma at various stages of its progression.
- Identify high-risk tumor characteristics and indications for Mohs surgery and the impact of patient characteristics and expectations on the results of the procedure.
- Recognize the need for increased vigilance for the development of skin cancer in immunocompromised patients.
- Explain available methods for assessing and monitoring Spitz nevi.
- Describe available nonsurgical options for managing superficial nonmelanoma lesions.
- Define the underlying processes that lead to Merkel cell carcinoma, how recurrences can be diagnosed early, and resources for management.
- Discuss NCCN guidelines on melanoma surveillance, diagnostic tests and recurrence risk calculators.
- Describe techniques for managing keloids that offer the greatest benefits with minimal risk of scarring.
- Diagnose, and develop treatment strategies for hypopigmentation disorders.
- Discuss the latest data on the prevalence, severity, and impact of primary axillary hyperhidrosis and other common forms of hyperhidrosis.
- Outline strategies for diagnosing primary axillary hyperhidrosis and other forms of hyperhidrosis, including the use of validated instruments to assess the impact of the condition on affected patients.
- Review the evidence regarding the efficacy and safety profile of various first-line and subsequent therapies for various types of hyperhidrosis, as well as patient candidacy for the different treatments.

ACCREDITATION AND DESIGNATION STATEMENTS

PHYSICIANS

This activity has been planned and implemented in accordance with

the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint sponsorship of the University of Louisville School of Medicine and Skin Disease Education Foundation/Global Academy for Medical Education, LLC. “In 2020, SDEF's Annual Hawaii Dermatology Seminar celebrates 44 years of excellence in providing CME/CE to dermatologists and all the healthcare professionals who treat skin diseases.

For six days you'll have the opportunity to learn from the experts and mix with your peers.

We provide medical and aesthetic sessions focusing on serious science and the latest developments.

Add that to our engaging interactive discussions and you'll know that your time with us was productive and well spent.”

JOIN US AT SKIN DISEASE EDUCATION FOUNDATION'S 44TH ANNUAL HAWAII DERMATOLOGY SEMINAR®

Join us in Maui as we explore the latest advances in the treatment and management of common and complex diseases of the skin, both for adults and children as well as new developments in aesthetic medicine.

Our exceptional faculty will present clinically relevant information that you will find immediately useful in the care of your patients. This six-day meeting provides interactive presentations, case studies in medical dermatology, live-patient injection sessions and multiple workshops. Learn from the experts about acne, rosacea, actinic keratoses, skin cancers, psoriasis, atopic dermatitis, nonsurgical facial rejuvenation, psoriatic arthritis, surgical pearls, and much more.

Skin Disease Education Foundation's (SDEF) 44th Annual Hawaii Dermatology Seminar's comprehensive agenda contains cutting-edge, innovative and evolving issues relevant to practicing physicians and healthcare providers who treat diseases of the skin. Our scientific program has been designed to keep the clinician up-to-date on new developments within the field of dermatology.

This year we are offering a Dermoscopy workshop. As always, we offer the opportunity to network with your peers at our Welcome and Luau Receptions, both of which are included with your registration.

We look forward to seeing you in Maui at SDEF's 44th Annual Hawaii Dermatology Seminar.

This Conference Is For You:

Dermatologists, dermatology residents, fellows, family physicians, internists, nurse practitioners, registered nurses, physician assistants, and pharmacists will all gain important insights into the management of patients with skin diseases.
