"What Cancer and Careers and Triage Cancer brought to the forefront was the importance of clinicians and support staff understanding the patient as a whole, including their financial needs and concerns, career concerns that are compounded by a diagnosis of cancer, and legal concerns that frankly would rarely be on an oncology provider's radar screen. This wonderful seminar you provided to us was a wealth of new information, resources and tools that can be incorporated into treatment decision making. We are now more aware of these potential issues that directly impact our patients during treatment as well as into long term survivorship."

- In-Service Attendee
