5TH SNIS International Endovascular Stroke Conference (IESC)

Dear Colleague,

We enthusiastically invite you to join us for the first International Endovascular Stroke Conference (IESC) to be held outside the U.S. As part of the SNIS mission to enhance stroke care around the world, we are joining forces with our Australian colleagues to bring you a one-day dive into the waters of stroke disease and treatment.

Consider the slate of activities. The most renowned veterans of the neurointerventional community will take the stage to cover various topics of interest, such as the recent positive stroke trials, the global approach to stroke, patient selection, anesthesia and pre-procedure care. Interspersed in the program will be informative and entertaining “point-counterpoint” discussions where forum attendees can participate in debate on such issues as Sedation vs. Anesthesia, Balloon Guide vs. Local Aspiration in Acute Stroke and the Need for Further Stroke Trials.

But as much as this forum is designed to give participants an opportunity to talk “all things stroke” from inside the neurointerventional community, it is also designed to provide a “surround-sound” experience by inviting other stakeholders to share a seat at the table. Chief among our guests will be experts on stroke neurology and anesthesia, all of whom will share their perspective of the status of stroke care, pertinent needs and ideas for progress.

Make your plans now to join us in November in Queensland! As we gather “down under”, we are confident that this forum will not only continue the tradition of excellence found in previous IESCs but, with the added component of a truly international faculty, be our best one yet. We look forward to seeing you there!

Sincerely,

Bruce Campbell, MD
Australia Program Chair

Peter Mitchell, MD
Australia Program Chair

Imran Chaudry, MD
USA Program Chair
