Cancer Center**

An Organ System Approach to Integrating PET and CT Findings for Optimal PET/CT Interpretation

This course will cover the body from head-to-toe, in an organ systems based approach. It will emphasize the integration of FDG PET and CT findings to arrive at the best interpretation of imaging findings in each organ system. This will provide attendees with an organized systematic approach to reading oncologic FDG PET/CT.

This course is designed for Radiologists and Nuclear Medicine Physicians, Radiologists, and others ordering or interpreting Oncologic PET/CT studies.

Course Textbook

Fundamentals of Oncologic PET/CT
Included in course registration, course attendees will receive a copy of the course textbook, Fundamentals of Oncologic PET/CT, written by Course Director, Gary Ulaner.

American College of Nuclear Medicine (ACNM) member discount available. Please see 'Registration' for more information or visit: mskcc.org/PETCT
