AAP Insurance Seminar

Careful and accurate management of insurance claims is one of the most important services you can offer patients today. Timely submission, precision coding, and excellent communication with patients and third parties can impact the success of your practice. Staff responsible for the management of insurance claims and coding will benefit by attending this workshop to sharpen their skills and learn new ways to improve delivery of service to internal and external customers.

The Insurance Workshop will be presented by the Third Party Specialist for the AAP. Also, as of January, 2008 the insurance workshops that are requested by state and regional periodontal societies can provide 3.5 CE credits to their group under the ADA CERP standards towards their practice management requirement, as long as the group is a certified CE provider.

Learn: Differences between types of dental insurance to increase effective patient communication; To properly apply ADA new CDT-2018 codes, for more accurate coding submissions; To communicate with third parties to handle controversial coding issues; The basic structure of AMA codes and to recognize appropriate indications for submitting to medical; and information about ICD-10-CM coding.
