ONSITE COURSE

#326 Pediatric Handling Intensive: Contemporary Practice of NDT

Instructor: Leslie Paparsenos, PT,
Physiotherapist, MS, C/NDT

Audience: Physical Therapists and Assistants,
Occupational Therapists, Assistants and Speech
Language Pathologists

Course times (14 Hours):

Day 1: 8:00 am – 5:00 pm

Day 2: 8:00 am – 4:00 pm

SUMMARY: As clinicians treating individuals with central nervous system dysfunction, such as cerebral palsy, congenital hypotonia and other multi-system impairments, we can make advances in our clinical decision making skills by establishing hypotheses regarding the critical impairments that we observe in our assessments and be more precise in our treatment sessions. This 2-day, hands-on lab intensive seminar is designed to further enhance the ability to treat children with CNS dysfunction.

We will briefly review the current Neuro-Developmental Treatment (NDT) Practice Model that supports our treatment planning and the strategies used within a treatment session. Development of your handling skills will be emphasized as a way to influence impairments related to the clients's functional outcomes. Discussion of therapeutic intervention and the clinical decision-making process will be facilitated. A combination of didactic, video examples, laboratory learning experiences and patient demonstration will ensure the integration of NDT as a foundation for intervention.

Instructor: Leslie Paparsenos, PT, MS, C/NDT is an independent, pediatric therapy provider, licensed Physiotherapist in Australia, and licensed Physical Therapist in the United State of America. She specializes in evidenced based, pediatric rehabilitation, serving babies, children and adolescents across a spectrum of neurological and developmental disabilities, and their families. Leslie is a certified Pediatric NDTA™ (USA) Instructor, certified in NeuroDevelopmental Treatment (NDTA™ (USA)), and a certified clinical instructor by the APTA (USA). She has been teaching both internationally and nationally since 2007. Leslie is committed both to supporting therapists in their clinical development and assisting families and children in their journey to independence. Financial— Receives a teaching honorarium from Motivations Inc. Nonfinancial— No relevant nonfinancial relationship exists

OBJECTIVES: Upon completion of this course, the participant will be able to:

1. Demonstrate the ability to use graded sensory input to influence posture and movement for a given individual with a neurological impairment.
2. Summarize 3 essential elements of intervention after identifying the relationship between functional limitations and impairments.
3. Describe a treatment strategy using at least 3 interventions discussed in this course for a given neurological impairment.
4. Demonstrate the ability to use sustained and intermittent touch of varying pressures with movement, joint compression, and traction.
5. Identify at least 3 treatment strategies/techniques that effectively address alignment, base of support, muscle activation in the client with a neurological impairment in order to maximize functional and occupational performance, such as play participation

FORMAT: This is a 14-hour course equivalent to 1.4 CEUs.

PT: Motivations Inc is an approved provider by The Texas Chapter of the **APTA** and many additional state and chapter approvals.

AOTA: Motivations Inc. is an AOTA Approved Provider of professional development. Approved Provider ID# 06984. This Live activity is offered at 1.4 CEUs **Intermediate-Level**, Occupational Therapy Service Delivery/Foundational Knowledge. The assignment of AOTA CEU's does not imply endorsement of specific course content, products or clinical procedures.

ASHA: This course is offered for 1.4 ASHA CEUs. (Intermediate level, Professional area).

BRING: Course participants should wear loose, comfortable clothing that will allow facilitation of movement. Bring a thicker yoga mat since this is a handling intensive course with labs on the floor.

Course Offerings

For information about course locations and dates,
visit our website at www.motivationsceu.com

AGENDA:**Day One:**

8:00-10:30 Registration; Introduction: NDT Practice Model
10:30-10:45 Break
10:45-12:00 Postural Analysis and Control (Lab)
12:00-1:00 Lunch (on your own)
1:00-2:30 NDT Handling Concepts (Lab)
2:30-2:45 Break
2:45-5:00 Levels of touch - Compression/traction

Day Two

8:00-10:30 Elongation Facilitation (Lab)
10:30-10:45 Break
10:45-12:00 Facilitation of Transitions (Lab)
12:00-1:00 Lunch (on your own)
1:00-2:30 Patient demonstration and discussion
2:30-2:45 Break
2:45-4:00 Facilitation of Transitions (Lab)

Satisfactory Completion: Successful completion of lab practice as confirmed by the instructor's review at the course.
