

PROGRAM

Health Care Transformation

The health care sector in Ontario is under tremendous fiscal and human resource pressure as society emerges from the COVID-19 pandemic. The health care system is adapting in order to meet the demands of the patient population. This meeting highlights several technological and system innovations that have recently been introduced to enhance patient care and focuses on future directions.

Overall Learning Objectives:

At the end of this meeting, participants will be able to:

- recognize the changing landscape of orthopaedic surgery delivery models in Ontario;
- develop an understanding of robotic-assisted surgery and its applications; and
- identify common issues with the schedule of benefits.

A minimum of 25% of each session will be dedicated to interactivity.

Friday, November 3, 2023
