COURSE OVERVIEW

This year's symposium will focus on new technologies and advances in otolaryngology, multidisciplinary team approaches, and legal/business considerations in an ever changing healthcare environment.

This is a special occasion featuring our Alumni – celebrating their academic success and sharing scholarly and innovative accomplishments.

Target Audience: This course is designed to meet the educational needs of health professionals involved in all aspects of otolaryngology. This includes a broad audience of otolaryngologists, allergists and immunologists, neurologists, audiologists, internists, primary care providers, nurses, nurse practitioners, and other allied health providers.

EDUCATION OBJECTIVES

At the conclusion of this course, participants should be able to:

- Discern the broader implications of laryngeal pathology, and the varied ways of evaluating them.
- Discuss the complexities of varied head and neck, facial cutaneous defects and approach them with multiple options for closure.
- Comprehensively approach sinonasal disease from both a clinical and radiologic perspective.
- Logically evaluate swallowing and dysphasia as it commonly is evaluated in the otolaryngology practice.
- Discuss and debate the ongoing challenges faced by the practicing otolaryngologist beyond the sphere of clinical medicine

ACCREDITATION AND DESIGNATION STATEMENT
