COURSE OVERVIEW

This course uses a blend of interactive plenaries and case-based large group workshops for a practical review and clinical updates across a range of women's health issues in primary care. Topics range from domestic violence, non-surgical breast issues and interpretation of cervical and ovarian investigations, to transgender medicine and sexual assault.

COURSE OBJECTIVES

The intent of the conference is for learners to:

- use best-practice on diagnosis, treatment and management of women's health issues in primary care
- recognize local resources that can support primary care in women's health
- develop networks with specialists and colleagues for exchange of information and solution-sharing on common challenges

WHO SHOULD ATTEND

Family physicians, nurse practitioners and other primary care health professionals with an interest in women's health.
