with Comments from the Audience and Panel

Final Q&A and Wrap Up

CONFERENCE OBJECTIVES

At the conclusion of the conference, the participant should be able to:

HALLUX VALGUS SURGERY: The attendee will become familiar with different surgical procedures in the management of associated HAV deformities.

FOREFOOT SURGERY: The attendee will become familiar with different surgical procedures in the management of associated forefoot deformities.

REARFOOT SURGERY: The attendee will be exposed to the various options in trauma repair and how to address the options, risks and long term complications of different procedures on the rearfoot.

COMPLICATIONS: The attendee will be exposed to the various options in trauma repair and how to address the options, risks and long term complications of different procedures.

DIABETES, INFECTIONS, AND WOUNDS: The attendee will become familiar with all different surgical options in the management of diabetes, wounds, and infection cases.

TOPICS OF INTEREST: The attendee will gain knowledge and understanding of various topics that the podiatric physician may encounter related to soft tissue, innovations, etc.

MEDICINE: The attendee will become familiar with the current treatment options and advanced therapies in the various medical conditions that present to a podiatric physician.

DERMATOLOGY: The attendee will gain a better appreciation for the wide array of dermatologic conditions that can present in the skin and nails of the foot. Diagnostic methods and treatment protocols will be reviewed. Indications for biopsy procedures will be discussed in the context of a hands-on workshop that will include the most useful plastic procedures for post-biopsy excisions on the skin of the foot.
