Introduction

Dear colleagues,

We are happy to announce the 7th Scientific Meeting promoted by the European Academy of Dermatology and Venereology (EADV) in Ticino.

Held in Bellinzona, the EADV has decided to continue this project aimed at fostering clinical care, research, education and training in the fields of dermatology and venereology and related medical fields in Ticino.

In close collaboration with the Società Ticinese di Dermatologia, the Dermatology Departments of Ente Ospedaliero Cantonale, the Institute for Research in Biomedicine, and the Scientific Programming Committee of the EADV, this one-day meeting will again consist of a basic research session in the morning and a clinically oriented session in the afternoon.

The EADV programme will proudly feature distinguished researchers and clinicians with recognised experience in their field to discuss a number of practical relevant advances in their fields.

Medical progress always profits from the co-operation of both researchers and clinicians by raising research questions, designing clinical and scientific studies, applying new diagnostic and therapeutic methods and providing appropriate material and information on patients and diseases. The EADV thus hopes that the 2015 programme will raise the interest and attention of not only of local researchers and dermatologists, but also of allergologists, immunologists, internists and oncologists by addressing areas with significant clinical interdisciplinary overlap.
