WELCOME MESSAGE

The second edition of the Paris International Shoulder Course has shown a significant attendance increase. The Paris Course is now an inescapable event for anyone interested in Shoulder Replacement and has become the worlds largest meeting dealing with that subject. As in 2013, the 2015 course format and content showed a high satisfaction level. We are happy to present you now the programme of the third edition, PISC 2017.

Our principal goal remains to offer to all levels - from junior trainees to experts in the field - a range of practical information with regard to new techniques and ideas. The final goal is to treat our patients better. We will propose a scientific program with up to date information concerning long-term results and latest innovations on shoulder prosthetic arthroplasties. This course is yours, anyone will benefit from these 3 world-class scientific days.

A large conference area will be set up for debates where experienced specialists will be able to share their knowledge and examples of difficult cases.

This event will be a great occasion to network with your colleagues from all over the world.

We look forward to welcoming you to Paris!
