CONFERENCE SCHEDULE

PRECONFERENCE B (1:15 – 5:30 P.M.) MENSTRUAL BLEEDING: NORMAL AND ABNORMAL

Anita L. Nelson, MD

Understanding the normal menstrual cycle provides a basis for developing differential diagnoses and designing the work-up and management of abnormal bleeding patterns. This course will use the modern FIGO terminology and cases to explore office-based evaluation of women of different ages who present with secondary amenorrhea or infrequent bleeding and those with heavy menstrual bleeding.

THIS PRECONFERENCE WILL ENABLE YOU TO:

- ▶ Describe the elements of the normal menstrual cycle involving all elements of the hypothalamic-pituitary-ovarian axis and the endometrium.
- ▶ Apply knowledge of normal endometrial changes to manage unscheduled bleeding with combined oral contraceptives.
- ▶ Develop differential diagnoses, work-up and management strategies for secondary amenorrhea, infrequent bleeding and heavy menstrual bleeding.

PRECONFERENCE C (8:00 A.M. – 12:15 P.M.) BACK TO BASICS: PILLS, PATCHES, RINGS

This Preconference will focus on not only key clinical issues regarding combined hormonal contraception, but also understanding a bit more about the hormones themselves. Don't worry, we won't be getting back into college level chemistry, but discussing what makes a progestin a progestin, the difference between the types used in hormonal contraception, and why you may want to choose one over the other.

THIS PRECONFERENCE WILL ENABLE YOU TO:

- ▶ Review and understand how different progestins contained in hormonal contraception vary and why this might be important in clinical practice.
- ▶ Develop a strategy to balance risk of hormonal contraception versus side effects.
- ▶ Discuss the new guidelines of how to manage adherence issues and when to consider testing for pregnancy.
