12:45 – 1:15pm	Break with exhibitors/Move to cadaver Lab	
1:15 – 4:00pm	<i>Minimally Invasive Surgery Cadaver Lab – Session 3</i> Laparoscopic Uterosacral Ligament Suspension Laparoscopic Repair of Cystotomy and Serosal Bowel Injuries	All Faculty
4:00pm	Course Adjourns	

Minimally Invasive Gynecologic Surgery Course and Cadaver Lab Tampa, FL

Target Audience: This activity is designed to meet the educational needs of Obstetricians, Gynecologists, Gynecologic Surgeons, OB/GYN residents and fellows.

Learning Objectives (Main Conference) Upon completion of this course, the participants should be able to:

- Accurately identify key components of pelvic anatomy essential to performing minimally invasive gynecologic surgery.
- Identify appropriate surgical techniques and instrumentation to efficiently perform laparoscopic suturing and knot tying during minimally invasive gynecologic surgery.
- Describe appropriate medical and surgical management options for patients presenting with complex, benign gynecologic conditions.
- Apply knowledge and problem-solving skills necessary for the management of complications from minimally invasive gynecologic surgeries, including the best practices in laparoscopic bladder and bowel injury repair.
- Demonstrate techniques utilized in pelvic sidewall dissection required in advanced endometriosis surgery.
- Demonstrate effective communication skills with team members to improve overall patient care quality and safety during minimally invasive gynecologic surgeries.

Learning Objectives Upon completion of this seminar, the participants should be able to:

**(Pre-Course
Hysteroscopy Lab)**

- Describe the steps needed to build a successful office hysteroscopy practice
- Select appropriate instrumentation for use in operative hysteroscopy.
- Demonstrate the skills and techniques necessary to perform operative hysteroscopy for AUB, polyps, fibroids & RPOCs.
- Apply the skills needed to minimize and manage hysteroscopic complications.
