Join us at **Skin Disease Education Foundation's (SDEF) 17th Annual Las Vegas Dermatology Seminar**, November 10-12, 2016. Nationally known leaders in the field of dermatology will present recent advances and emerging trends in the diagnosis, treatment, and monitoring of patients with skin diseases. This highly scientific three-day CME/CE conference features key clinical topics such as acne, rosacea, AK, contact dermatitis, psoriasis, atopic dermatitis, onychomycosis and other fungal infections, infectious diseases in dermatology, fillers, toxins, devices, cases and more.

SDEF's Psoriasis Forum is now in its 13th year. This in-depth, comprehensive program is featured on day two. Clinical presentations, interactive panels and cases covering current and emerging therapies for the treatment of psoriasis are covered throughout the day.

SDEF's 17th Annual Las Vegas Dermatology Seminar including the **13th Annual Psoriasis Forum** will be of interest to both the seasoned clinician and residents. Please join us November 10-12, 2016, at The Cosmopolitan in Las Vegas for a rewarding educational experience. The format is informal and relaxed, encourages a free-flowing exchange of ideas between our expert faculty and colleagues as well as providing practical solutions that are immediately useful in improving patient outcomes.

THIS CONFERENCE IS FOR YOU

Dermatologists, dermatology residents, primary care physicians, physician assistants, nurse practitioners, nurses, pharmacists and other healthcare professionals who manage patients with common and complex skin diseases.

LEARNING OBJECTIVES

At the conclusion of this live conference, participants should be better able to:

- Integrate into daily practice evidence-based recommendations on new and emerging therapies for common and uncommon dermatologic diseases.
- Assess the risks and benefits of currently available options for acne.
- Develop optimal treatment strategies for acne that include patient counseling to set expectations and to improve adherence.
- Recognize early signs and symptoms of actinic keratoses and squamous cell carcinomas, and other nonmelanoma skin cancers.
- Design management strategies for actinic keratoses and squamous cell carcinomas that include a plan for sun protection and aggressive follow-up care.
- Describe the intrinsic and extrinsic factors that contribute to underlying changes in facial anatomy.
- Identify the appropriate fillers and/or toxins to use for various areas of the face.
- Compare and contrast the benefits and limitations of newer surgical and nonsurgical techniques and topical treatment options for aesthetic and procedural dermatology.
- Discuss the most current evidence-based guidelines for differential diagnosis and assessment of atopic dermatitis.
- Develop a strategy for the optimal management of atopic dermatitis, including rotational regimens.
- Recognize the clinical and laboratory tests available for detecting and evaluating onychomycosis.
- Evaluate the results of clinical studies on new and emerging treatments for onychomycosis.
- Interpret and evaluate emerging clinical trial data related to the mechanisms of action, efficacy, and safety of currently available and emerging biologics and other agents used to treat psoriasis.
- Formulate a management plan, based on existing guidelines and emerging evidence, that incorporates updated recommendations for patients with psoriasis using topical and/or systemic therapies.
- Assess and manage comorbidities in patients with psoriasis.
- Recognize dermatologic conditions that should be considered in differential diagnosis of a patient with signs and symptoms of rosacea.
- Identify agents approved for use in treating rosacea.
- Describe factors, including vehicle formulation, that may affect the efficacy and tolerability of, and patient satisfaction with, agents used in management of rosacea.
- Diagnose and manage dermatologic symptoms resulting from infectious disease.
