Extended VTE Prophylaxis for High Risk Surgical Patients is the New Standard: Who, When and Why?

Release Date: January 19, 2017**Expiration Date:** January 19, 2019**Estimated Time of Completion:** 45 minutes**Description**

[Innovations in Surgery](#) is a series of CME-certified webcasts that allow participants to view prerecorded demonstrations and discussions of new and innovative minimally invasive procedures, devices, and techniques. The monthly series of archived webcasts features presentations by and discussions with nationally renowned experts at prestigious medical centers.

The **Extended VTE Prophylaxis for High Risk Surgical patients is the New Standard: Who, When and Why** webcast reviews methods to appropriately extend venous thromboembolism prophylaxis in high risk surgical patients. The risk of post-discharge venous thromboembolism after bariatric surgery will also be reviewed.

Learning Objectives**Target Audience**

These activities are directed to practicing surgeons and other health practitioners who care for
