THE ELECTRIC TOWN-TOKYO

Tokyo, Japan's capital and the world's most populous metropolis. Tokyo is on the Kanto plain, flanking Tokyo Bay, 35 degrees 41 minutes north scope and 139 degrees 46 minutes east longitude. Tokyo, Japan's busy capital mixes the ultramodern and the traditional, from neon-lit skyscrapers to historic temples. Tokyo is a nirvana for foodies, and has the world's highest volume of Michelin stars in a city. Shopping is another highlight - it's worth bringing an empty suitcase to fill with hard-to-resist gadgets, trendsetting garments and treasures from craft and design stores.

World's highest Skywalk- the Tokyo Sky tree is the tallest free-standing tower in the world, measuring 634m. The observation deck at 450m is the world's highest skywalk and offers panoramic views of the city.

Tokyo can't be judged all things considered, since those expecting old landmarks will rather be welcomed with present day dreariness. The Imperial Palace, still home to the Emperor, shouldn't be missed, and the Edo-Tokyo Museum points of interest the city's history. Sensoji Temple is the city's most established, and the Tokyo National Museum holds the biggest accumulation of Japanese craftsmanship on the planet.

Today, Tokyo offers a seemingly unlimited choice of shopping, entertainment, culture and dining to its visitors. The city's history can be appreciated in districts such as Asakusa, and in many excellent museums, historic temples and gardens. Contrary to common perception, Tokyo also offers a number of attractive green spaces in the city center and within relatively short train rides at its outskirts.
