

the **difficult** airwaycourse™

ANESTHESIA

*Designed by anesthesiologists to advance the skills
of even the most experienced providers.*

- ✓ **Strengthen Decision-Making**
Learn evidence-based strategies for airway management, including awake intubation.
- ✓ **Be Ready for Emergencies**
Identify and manage 'can't intubate/can't oxygenate' situations, including surgical cricothyrotomy.
- ✓ **Refine Extubation Skills**
Know when and how to use the airway exchange catheter safely.
- ✓ **Lead Under Pressure**
Develop crisis team leadership and communication skills to empower yourself and your team.
- ✓ **Hands-on, Expert Led Training**
Practice advanced airway techniques and apply them in challenging Code Airway simulations, guided by our international faculty of airway experts.

March 6 - 8, 2026
